Important Information

Important Information About This Report

This report is for informational purposes only and contains data and analyses based on information derived from sources believed to be accurate, but their accuracy cannot be assured. It reflects our records regarding only those assets under our supervision (i.e., management) and is not a report of physical custody of the assets. The account statement provided by the custodian is the official record of your account. The information herein is as of the date indicated and is subject to change.

Past performance is not a guarantee of future results. Performance information does not reflect the deduction of fees. Performance periods less than one year are not annualized. It is not possible to directly invest in an unmanaged index. Index performance information assumes reinvestment of all dividends. For the periods displayed, changes to the benchmark and/or its components may have occurred. To obtain information on these changes please contact your Financial Advisor or BlackRock Portfolio Manager.

This report is not a tax document and should not be relied upon for making tax decisions. It reflects our records regarding assets under our discretionary management and is not a report of physical custody of the assets. The account statement provided by the custodian is the official record of your account. BlackRock does not provide legal or tax advice. Please consult your tax and/or legal counsel for specific tax questions and concerns.

The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed may not represent an account's entire portfolio and in the aggregate may represent only a small percentage of an account's portfolio holdings.

It should not be assumed that any of the securities transactions or holdings discussed have or will prove to be profitable, or that the investment recommendations or decisions made in the future will be profitable or will equal the investment performance of the securities discussed herein.

The information contained herein has been obtained from various sources believed to be reliable, but we cannot guarantee as to its accuracy or completeness. Any opinions expressed herein are subject to change, and there can be no assurance that any opinions contained herein will come to pass.

If this report contains pooled vehicles (i.e. mutual funds, Exchange Traded Funds), note that asset classifications and other calculations contained herein may not fully reflect the investments contained in those pooled vehicles.

Client requested investment restrictions are based on the most recent information maintained by BlackRock. Please inform your BlackRock Portfolio Manager of any change to your financial circumstances or investment objectives, or if you wish to impose and/or change permissible restrictions on the management of your account.

Important Information (continued)

Definition of Key Financial Terms

Standard Deviation is a statistical measure that depicts how widely the returns of a portfolio varied over a certain period of time. A higher standard deviation indicates greater volatility or a wider range of returns.

Beta is a historical measure of the degree of change in value in a portfolio given a change in value of a benchmark. A portfolio with a beta greater than one generally exhibits more volatility than its benchmark, and a portfolio with a beta of less than one generally exhibits less volatility than its benchmark.

Sharpe Ratio is a measure of risk-adjusted return. It divides excess return by risk. Excess return is defined as the annualized return of the portfolio minus the annualized return of the risk free rate. Risk is defined by standard deviation. A high value for the sharpe ratio is generally considered to be positive since either the excess return is rather large or the level of risk is low.

Up Market Capture Return is the return of a portfolio during an up market which is defined as any month where the portfolio's benchmark return is greater than or equal to zero.

Up Market Capture Ratio is a measure of a portfolio's performance in up markets defined as any month where the portfolio's benchmark return is greater than or equal to zero.

Down Market Capture Return is the return of a portfolio during a down market which is any month where the portfolio's benchmark return is less than zero.

Down Market Capture Ratio is a measure of a portfolio's performance in down markets which is any month where the portfolio's benchmark return is less than zero.

Number of Up Months is the number of months that the portfolio was greater than (or equal to) zero in the period being measured.

Number of Down Months is the number of months that the portfolio was less than zero in the period being measured.
