Imagine the Possibilities

MINNESOTA STATE

NextGen Guiding Principles

The NextGen Guiding Principles were established when the initiative kicked off and will be used to drive decision making as well as leadership alignment communications and activities.

Seamless Experience for Students

Enhancing the student experience is foundational to providing extraordinary education in Minnesota. This includes a seamless experience for students across the Minnesota State system, regardless of the Minnesota State institution attended.

Student Outreach

Deliver targeted outreach and engagement throughout the student lifecycle. Enable interactions across channels and devices (including mobile devices).

Data and analytics

Create an integrated environment for data sharing. Improve the flow of information and access to business operations system-wide. Improve decision making. Provide a mechanism for capturing data comprehensively across the Minnesota State. Reduce the amount of redundant data across the Minnesota State system.

Full Integration of "non-core" and third-party solutions

To provide the best overall experience, all ERP and ancillary technology solutions must be fully integrated and adequately supported.

Maintain Competitiveness

To provide Minnesota with the highest value and most affordable higher education option, Minnesota State must remain competitive with other educational entities within and outside the state, including private and primarily online institutions.

System-wide processes and procedures

To both establish and maintain a consistent user experience, and to leverage cloud-based SaaS technology solutions effectively, future-state processes will need to be defined or redefined consistently across the system. This may also include the definition or refinement of policies and practices that assure efficient and consistent process are adopted system-wide.

System-wide software consistency

The number and type of technology solutions must be streamlined; duplicative solutions must be minimized or eliminated; and clear, effective governance must be established around the introduction, integration, and maintenance of third party and "non-core" solutions.

Security

Implement a stable, maintainable, secure, and intuitive suite of applications.

NextGen Guiding Principles - Vision

We selected 10 Guiding Principles to help drive project implementation decisions.

1. Start with leading practices

Set of structured activities designed to fill gaps or address needs in service delivery, and to produce innovative knowledge and tools.

2. Challenge the status quo

We are not rebuilding a replica of ISRS!

3. Design solutions for the end user

4. Minimize manual processes

5. Simplify when possible

6. Operate as a system

7. Work collaboratively and transparently

8. Communicate frequently

9. Engage institutions early and often

10. Maintain a single system of record

Project Risk Review 11

Analysis as of February 16, 2024

Project Risk Area Trend Analysis – Summary

Overall project risk remains serious

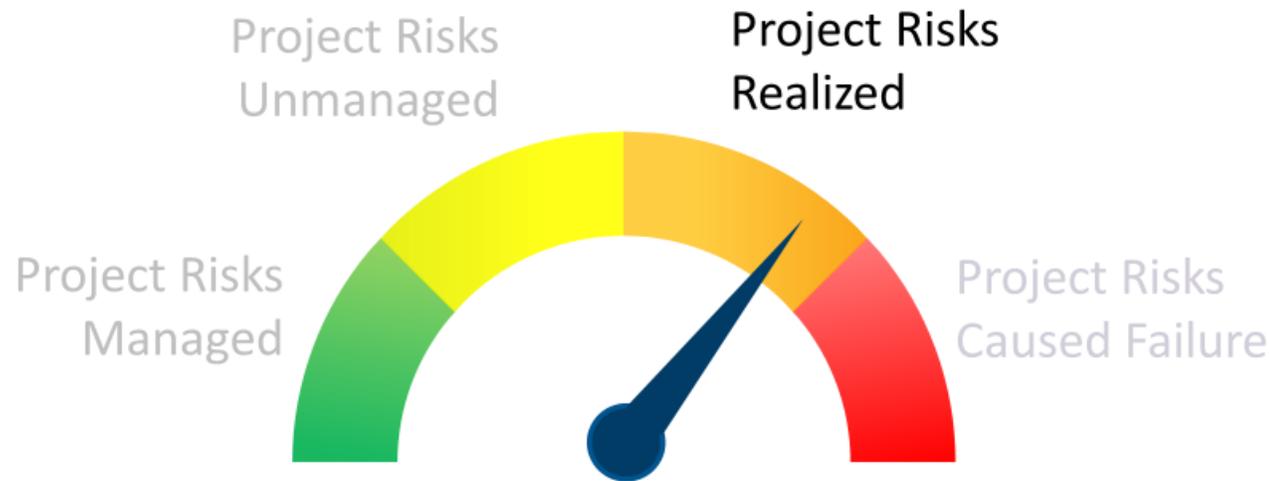

- Project management and organizational change management (OCM) risk areas have improved
- Critical blockers remain (see below)

Critical blockers still pose serious risk to the planned go-live

- Successful testing of payroll reconciliation and cost accounting
- Companion projects at the colleges and universities still in progress
- Sustainment plans finalization and implementation still in progress

Note: Summary is based on the information available to Internal Audit and analyzed as of February 16, 2024.

NextGen PRR Checkpoint 11 – Conclusion

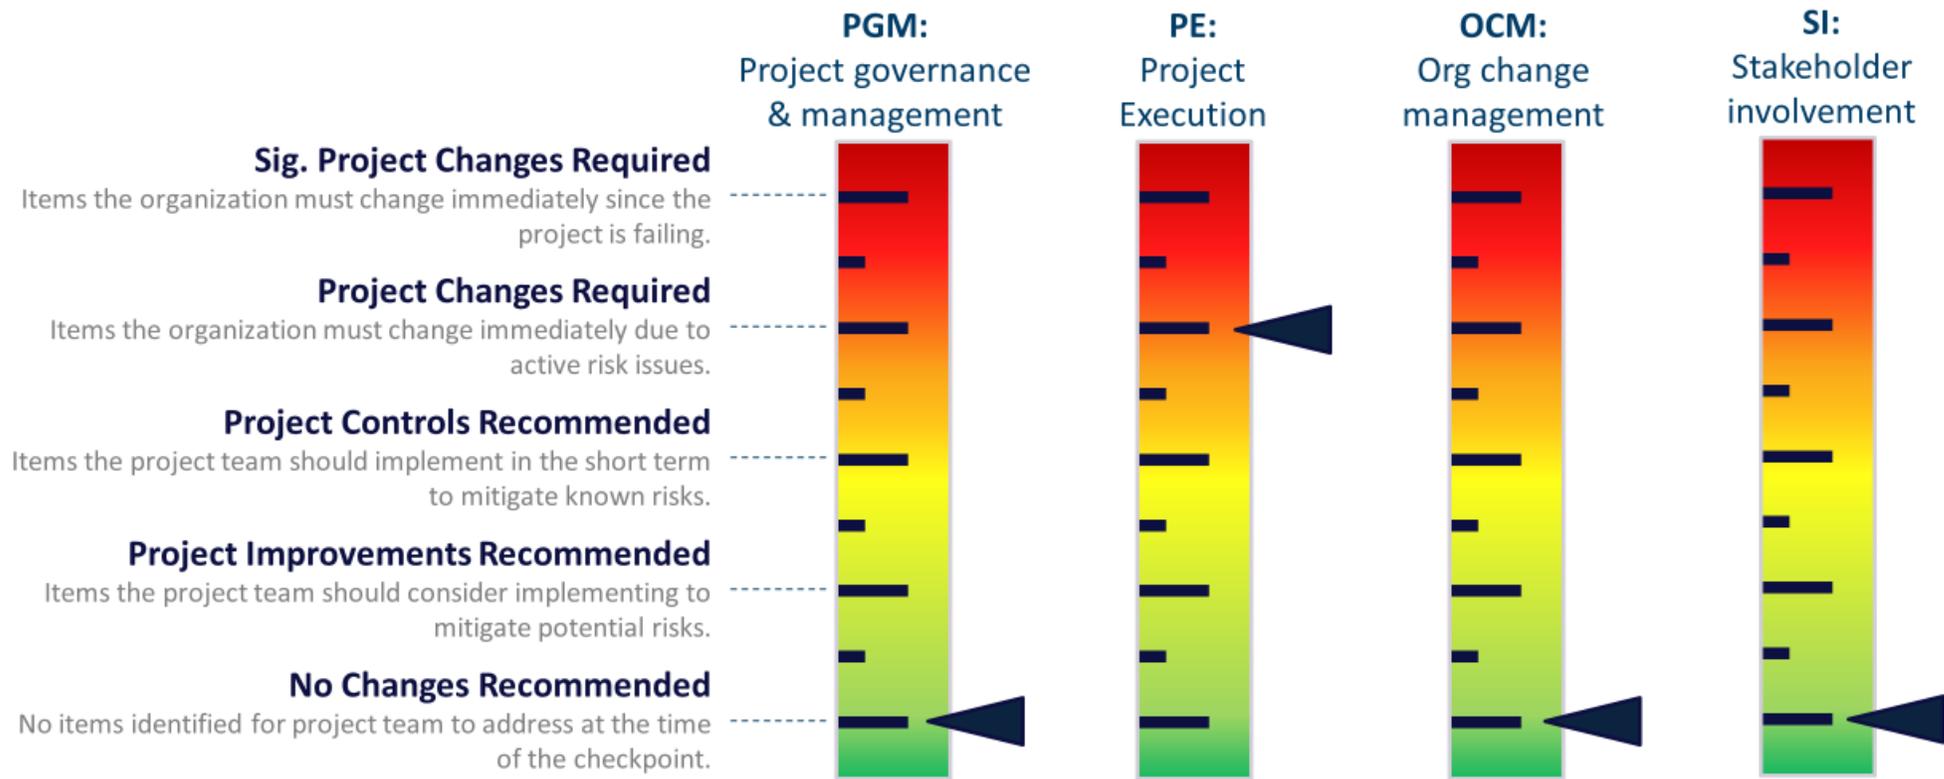

- Continued testing of Workday for finance and human resources, including payroll, integrations, reporting, and companion projects
- Overall risk of not achieving success is “Serious” due to active risks and issues, amplified by the blockers related to payroll reconciliations and testing that must be resolved to meet the July 2024 go-live

Note: Conclusion is based on the information available to Internal Audit and analyzed as of February 16, 2024.

Stable: Not likely to have adverse effect | **Elevated:** Likely to have limited adverse effect, requiring minimal time and resources

Serious: Very likely to have severe adverse effect, requiring substantial time and resources | **Significant:** Will have profound adverse effect, requiring significant time and resources

NextGen PRR Checkpoint 11 Results – New Recommendations

Stable: Not likely to have adverse effect | **Elevated:** Likely to have limited adverse effect, requiring minimal time and resources

Serious: Very likely to have severe adverse effect, requiring substantial time and resources | **Significant:** Will have profound adverse effect, requiring significant time and resources

NextGen PRR Checkpoint 11 – Recommendations

Define explicit activities and criteria for in-progress:

- Testing and payroll dress rehearsal
- Go/no-go decision and deployment

Finalize in-progress prior recommendations:

- Sustainment plans
- Companion projects
- Institutional responsibilities guide rollout
