Project Name Saint Paul Water System- 2023 CMP AWL # AWL-23-03083 PWS # AK2260286

Please direct any questions regarding the final report to Mary@AKWaterLabs.com or Matt@AKWaterLabs.com, or call 907-373-6130.

The results presented in this report meet the requirement of the laboratory's certifications and internal QC processes. Any exceptions will be noted in the case narratives attached. Subcontract data will be entered into AWL final reports. Full subcontract reports are available upon request.

The attached should contain analytical results for the analyses submitted on the client chain of custody. The information includes no opinions of the analysts or labs, data is represented after meeting certified testing requirements, and quality control measures.

Analytical Methods

Analyte	Analytical Method	Comments
Total Coliform, E. Coli	SM9223B Total Coliform PA	

Certification: Alaska Drinking Water

CMDP Job ID: 440755

Comments:

Alaska Laboratory #AK01000

Definitions:

DUP: Sample Duplicate

LCS/LCSD: Laboratory Control Sample/Laboratory Control Sample Duplicate

MRL: Method Reporting Limit

MB: Method Blank

MCL: Maximum Contaminant Limit MDL: Method Detection Limit

MS/MSD: Matrix Spike/Matrix Spike Duplicate

N/A: Not Applicable

TNTC: Cell count is Too Numerous To Count

<MDL: Result recovery is below the laboratory detectable limit, listed as the MDL.

Data Qualifiers:

B: The result of both the method blank and the target sample were recovered above the MDL.

D: Sample was diluted prior to analysis.

J: The reported result was recovered below the MRL (Method Reporting Limit), but above the MDL (Method Detection Limit), and should be considered an estimate.

U: Result was recovered below the MDL, MRL, LOD, and LOQ.

*: The LCS/LCSD or DUP was recovered outside method specified control limits.

H: Sample was recieved or analyzed outside of method specified holding time.

E: Sample recovery exceeded the MCL.

Q: One or more Quality Control criteria was recovered outside of control limits.

General Comments:

1.0) Basis: "As Received" = Analyzed as received from client. "Dry" = dried piror to being analyzed. "Dry Weight Corrected" = analyzed as received, result corrected for percent moisture.

Holiday hours

Contact your lab for

details and weekend

costs.

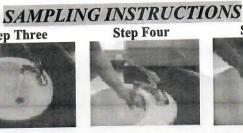

1: Do not rinse the bottle. The powder in the bottle is meant to be there and will not contaminate your sample.

2: Remove all hoses, aerators or screens from the faucet. Avoid filling from swivel faucets or kitchen sinks. After removing screens, disinfect the faucet by dipping the spout in a cap of bleach for 30 seconds.

3: Run water for at least 3-5 minutes to ensure that water has not been sitting in the pipes or tanks for a long time. WASH YOUR HANDS WITH SOAP AND WARM WATER!

4: Open sample bottle carefully. Remove the red plastic sterile strip from the bottle and fill the bottle to at least the fill line (120mL). Do not fill up to the top, allow 1" of head space.

5: Screw cap on tight. Take care not to touch the inside of the cap or bottle. If this happens, start with a new bottle.

Lab Use Only

Bottle ID: 2910

6: Fill out paperwork completely, include the time and date sampled Drop off or send the sample to the lab in secure packaging so the bottle does not break.

IMPORTANT: The lab must receive the sample when the lab is open for business and within 24 hours of collection.
