

MUNIBILLING®

Utility Billing Software Reimagined

Our easy-to-use, comprehensive cloud-based utility billing solution can bill for any service or fee! This allows for unlimited rates and tiers and supports integrations with meter reading systems and much more!

Flexible Billing Engine

Our system accommodates different tax rates, fees, and adjustable billing tiers for metered and non-metered bills.

Real-Time Reporting

Make decisions based on accurate accounts receivable, billing, customer accounts, meters, and real-time payments.

Customer Portal

Our Customer Portal provides an intuitive on-demand method to enable self-service.

Service Orders

Enable self-service submissions and tracking of requests through the Customer Portal.

Accounting Software

Optimize accounting processes and send batches of billing data to accounting software programs.

Secure Payment Options

Facilitate self-service on-demand and scheduled payments through the Customer Portal.

... And So Much More

Our platform constantly grows and improves; all customers benefit from our continuous research and development.

Flexible Billing For Every Industry

The MuniBilling engine is built to provide flexibility to accommodate billing requirements and bundle the charges for every type of billing scenario.

Municipalities

Achieve greater levels of self-service automation and insights to help your government agency provide the best and most cost-effective service.

Private Utilities

Predictable and reliable cost-effective cloud-based billing system to accommodate business requirements and customers.

Higher Education

Higher Education entities benefit from unlimited access to our online customer portal and mobile portal application to better facilitate and support self-service.

Multi-Family

There is no limit to how you can expand your service offerings and revenue opportunities. We provide efficient integrations with property management systems.

Diverse Services Billed

Our MuniBilling engine is intentionally designed to be flexible, accommodating various billing scenarios by bundling charges as needed.
