

STATE BOARD FOR COMMUNITY COLLEGES AND OCCUPATIONAL EDUCATION

October 9, 2024

TOPIC: Lamar Community College (LCC) Request for Approval of Transaction to Purchase Four Different Products for Construction Trades Program

PRESENTED BY:

Dr. Rosana Reyes, President, Lamar Community College

RELATIONSHIP TO THE STRATEGIC PLAN:

Transform the student experience: Allow students to continue working during adverse weather conditions, avoid delays, and complete construction faster than other programs. This would allow the institution to place the home on the market in hopes of receiving funds that will contribute to the future of this program.

EXPLANATION:

Lamar Community College is seeking approval for the College to purchase items (Concrete Curing Blankets/Concrete Forms/Steel Round Stakes/Air Compressor) from a vendor, Alpine Builders. Vendor is a current faculty member in the Construction Trades program at LCC.

Vendor: Alpine Builders
Employee Name: Rod Dunn
Hire Date: 8/14/17

Justification: Equipment would be instrumental in the role of building/remodeling homes through the COPERR Grant.

If allowed, the institution would develop a requisition/purchase order in the amount of \$9,620.00 for the purchase of these items.

A cost comparison is provided in the Business Purpose Cost Comparison document. Information is also provided in the Construction Trades Budget Purchasing – Alpine Builders Tools document.

RECOMMENDATION:

Dr. Rosana Reyes, President, Lamar Community College, requests approval of the above-described one-time purchase.

This request has been reviewed by the General Counsel.
