

Policy No.: 4039

Board Approved: June 20, 2017

Revised: February 20, 2024

Heroin and Opioid Addiction and Prevention Policy

The College is committed to promoting personal wellness and responsibility and recognizes that drug addiction is an illness of increasing concern throughout the state of Maryland and our country. These values are reflected in related Board policies 5092 Drug/Alcohol Free Environment and 4041 Student Drug and Alcohol Abuse Policy.

The Heroin and Opioid Education and Community Action Act of 2017 requires all incoming full-time students to participate in an in-person or electronic heroin and opioid addiction and awareness training. Hagerstown Community College will also provide incoming part-time students with resources that alert and educate them regarding heroin and opioid addiction and prevention.

The College will obtain and store a supply of overdose reversing medication to be used in an emergency situation. College police and security personnel, as well as designated administrators, will be trained to recognize the symptoms of an opioid overdose, trained in procedures for administration of overdose reversing medications, and trained in the proper follow-up emergency procedures related to an opioid overdose. Further, the College will make available resources for those coping with substance use disorders and pain management. The College will also follow all Maryland law reporting requirements. Per state law, except for any willful or grossly negligent act, campus police, or other designated personnel who have been trained in use of overdose medications and who respond in good faith to the overdose emergency of a student, may not be personally liable for any act or omission in the course of responding to the emergency.
