culture awards

Mike Cullen

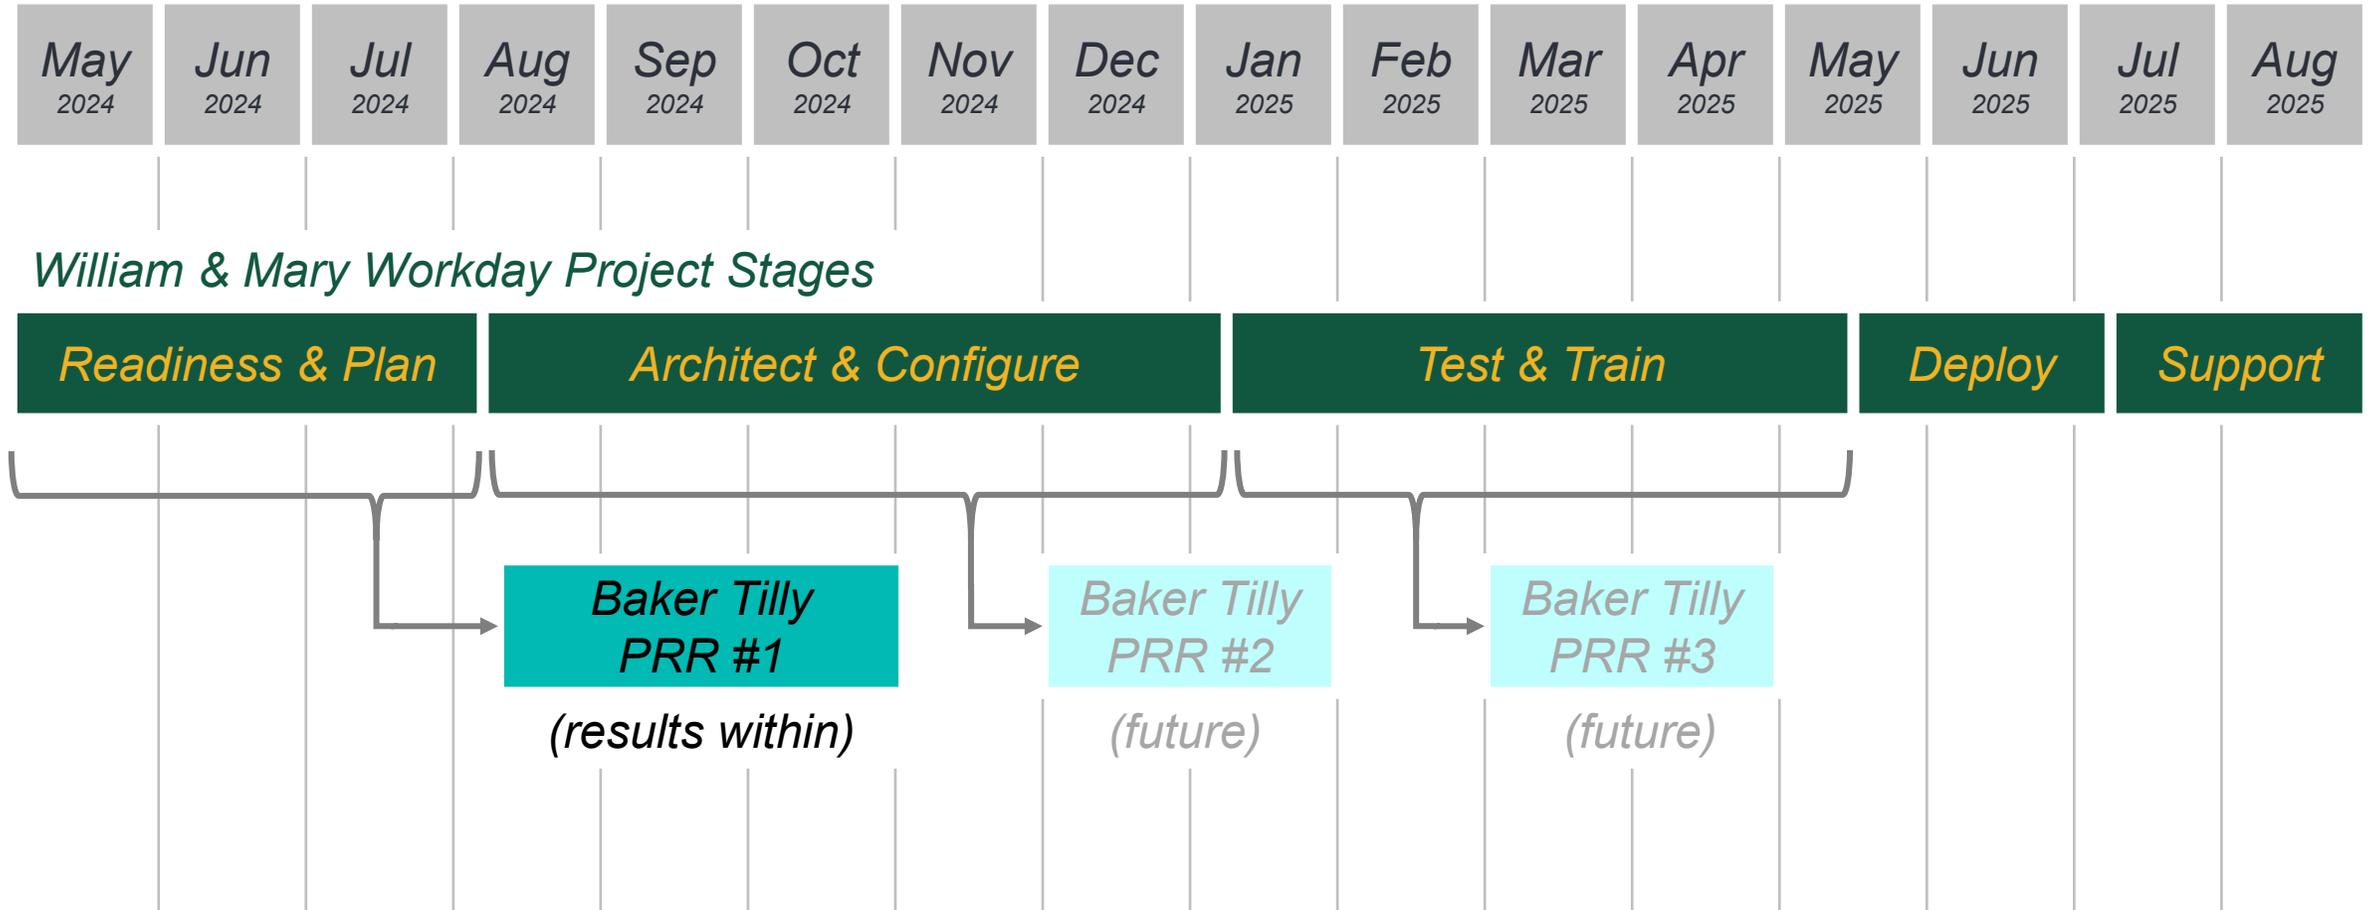

CISA, CISSP, CIPP/US, CCP/CCA

Principal

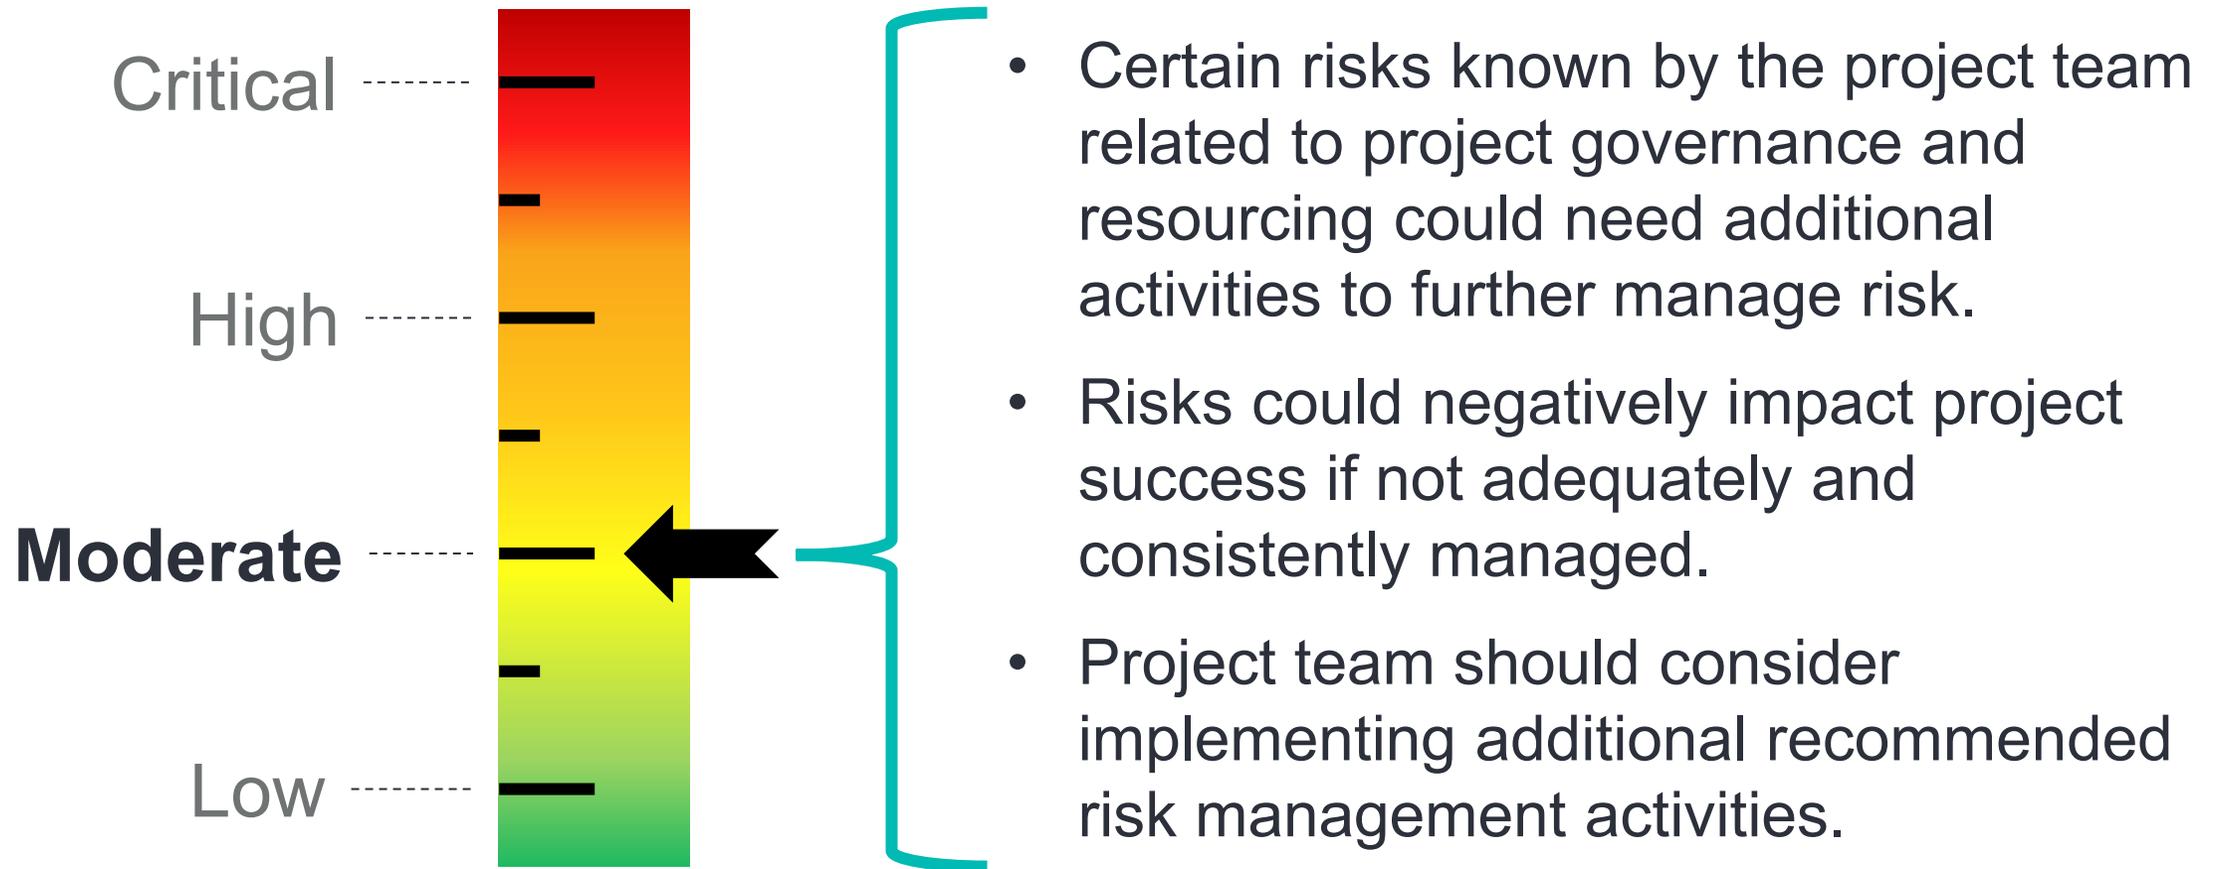

Firm leader for higher ed IT audit / cyber risk services

Timeline: Workday Project with PRR Scope

PRR Overall Risk Rating & Conclusion

Note: Conclusion based on information available to Baker Tilly and analyzed as of October 30, 2024.

Project Strengths Highlighted

Leadership Endorsement

- Active engagement and support from University leadership emphasizes project significance and empowers the project team to prioritize project work.

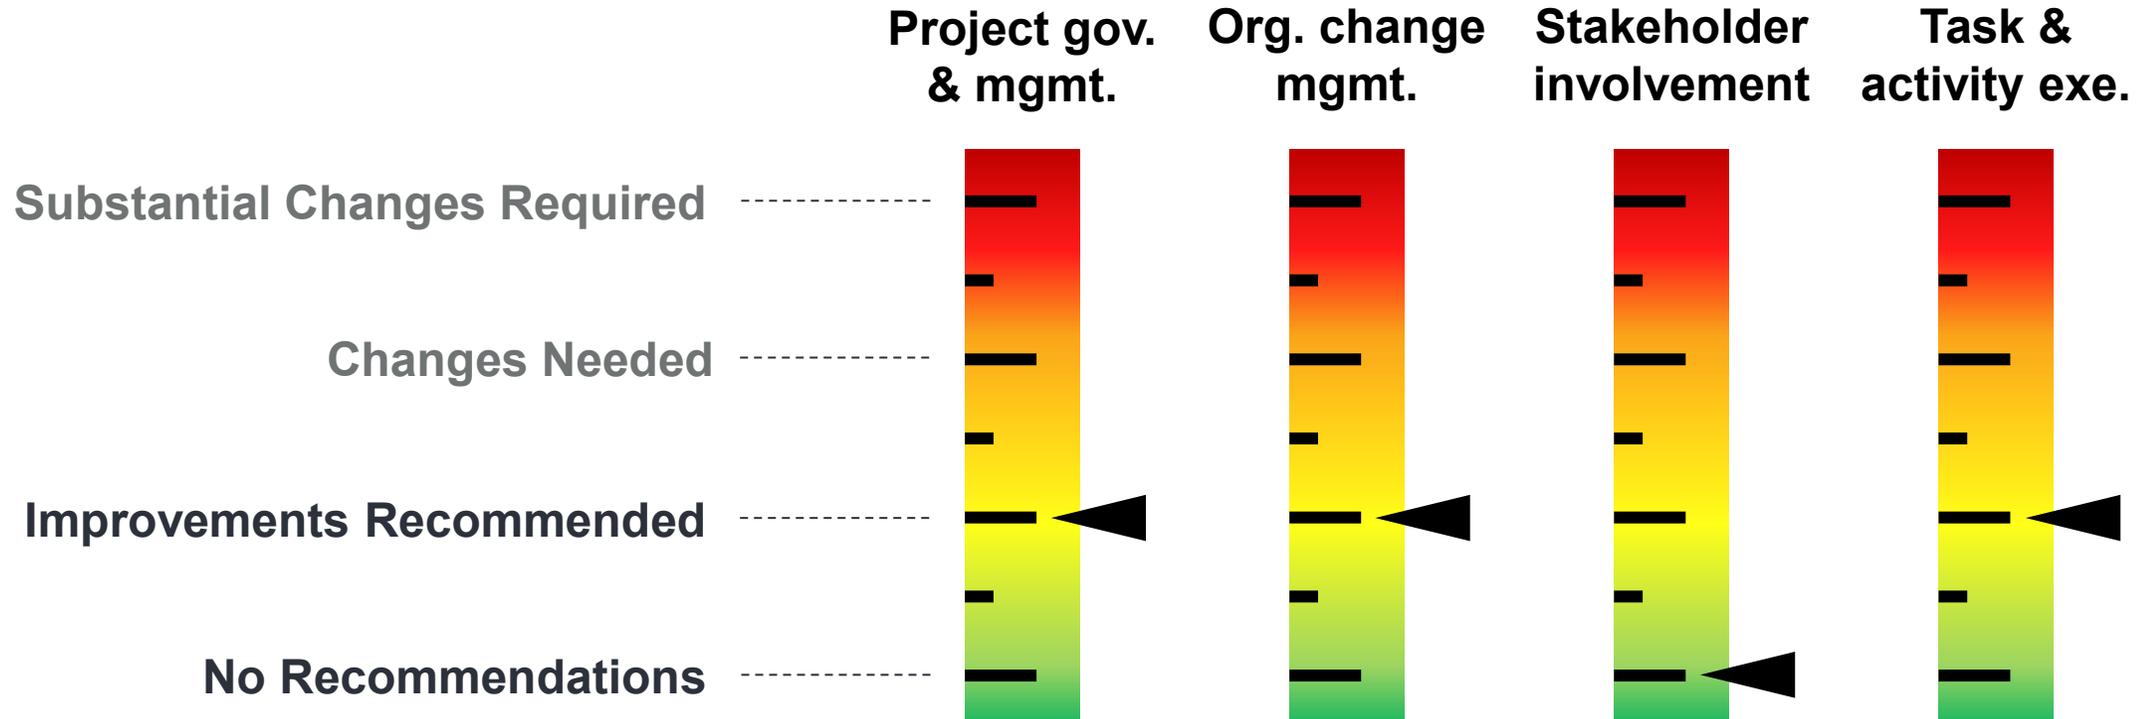

Guiding Principles

- Project approach of configure over customization should save effort during implementation and streamlines business processes.

Joint Responsibility

- Distribution of responsibility amongst groups of people (e.g., PMO) reduces single point of failure risk and increases flexibility for project workload management.

Summary Results by Project Success Area

Critical: Risks mostly unmanaged, will have significant adverse effect; substantial changes required

High: Risks partially unmanaged, very likely to have serious adverse effect; changes needed

Moderate: Risks generally managed, could have a limited adverse effect; improvements recommended

Low: Risks managed, likely no adverse effect; no recommendations

Summary of Recommendations

Project governance & management

- Develop monitoring for business process modernization
- Develop monitoring for people workloads
- Provide core team with project governance process refresher training

Organizational change management

- Develop Workday sustainment plan for long-term support model

Task & activity execution

- Dedicate additional project team resource hours for certain project roles
- Continue monitoring the progress of integrations work to determine additional resources needs
