KEY TERMS

1. **Continuum of Care (CoC).** Continuum of Care (CoCs) are groups of stakeholders – including service providers, local leaders, concerned neighbors, and people with lived expertise – working together to promote communitywide commitment to the goal of ending homelessness. The CoC works to quickly rehouse homeless individuals and families while minimizing the trauma and dislocation caused to homeless individuals, families, and communities by homelessness; promotes access to and effective utilization of mainstream programs by homeless individuals and families; and optimizes self-sufficiency among individuals and families experiencing homelessness. The Pinellas Continuum of Care (CoC) is also known as *FL-502 St. Petersburg / Clearwater / Largo / Pinellas County*.
2. **Housing Inventory Count (HIC).** The point-in-time inventory of provider programs within a CoC that provide beds and units dedicated to serve people experiencing homelessness. The U.S. Department of Housing and Urban Development (HUD) requires that CoCs conduct an annual count of people experiencing homelessness who are sheltered in emergency shelter (ES), transitional housing (TH), and safe haven (SH) on a single night.
3. **Point in Time Count and Survey (PIT).** The count of sheltered and unsheltered people experiencing homelessness on a single night in January. During the unsheltered count, volunteers search the community to locate and survey people experiencing homelessness. HUD requires an unsheltered count every other year.
4. **Unaccompanied Youth:** Persons younger than 25 who are not part of a family or accompanied by their parent or guardian during their experience of homelessness. This category includes both minors (under 18) and young adults (18-24). *
5. **Parenting Youth.** Persons younger than 25 who are the parent or legal guardian of one or more children (younger than 18) who are present with or sleeping in the same place as the youth parent. This category includes both minors (under 18) and young adults (18-24). *
6. **Person Experiencing Chronic Homelessness.** A person who:
 - A. Is homeless and lives in a place not meant for human habitation, a safe haven, or in an emergency shelter; and
 - B. Has been homeless and living or residing in a place not meant for human habitation, a safe haven, or in an emergency shelter continuously for at least 1 year or on at least four separate occasions in the last 3 years where the combined length of time homeless in those occasions is at least 12 months; and
 - C. Has a disability.

*Definition obtained from the Department of Housing and Urban Development. See <https://www.huduser.gov/portal/portal/sites/default/files/pdf/2023-AHAR-Part-1.pdf> for a reference.

EXECUTIVE SUMMARY

The Homeless Leadership Alliance of Pinellas, Inc. (HLA) is the lead agency in the Pinellas Continuum of Care (CoC). HLA organizes a count of sheltered and unsheltered homeless persons, which occurs on a single night in January. The count, known as the Point in Time Count and Survey (PIT) provides key insights into the scope of homelessness (e.g., prevalence, demographics, and needs of persons who experience homelessness). Findings from the count are used to improve targeted outreach efforts and community planning initiatives. Pinellas County's 2024 PIT took place on Thursday, January 25, 2024. The following summary provides a list of key findings from the 2024 Pinellas County Point in Time Count.

Housing Inventory Count

- 1,389 people were identified during the sheltered count, representing a 7% decrease from 2023.
- 61% identified as male and 39% identified as female.
- 50% identified as White and 43% identified as Black/African American.
- Most individuals were younger than 18 ($n=281$) or between the ages of 55-64 ($n=301$).
- Approximately 17% of sheltered individuals experienced chronic homelessness.

Point in Time Count and Survey

- 721 people were identified during the unsheltered count, representing a 12% increase from 2023.
- 67% identified as male and 32% identified as female.
- 58% identified as White and 32% identified as Black/African American.
- Most individuals were between the ages of 55-64.
- Approximately 6% of individuals experienced chronic homelessness, representing an 88% decrease from 2023.
- Most unsheltered individuals were surveyed in St. Petersburg and Clearwater.
- Approximately 36% reported a history of incarceration in the past 12 months.

Sheltered and Unsheltered Comparison

- A higher proportion of individuals who identify as White were unsheltered and a higher proportion of individuals who identify as Black/African American were sheltered.
- A higher proportion of individuals aged 35-44, 45-54, and 55-64 were unsheltered.

Pinellas County Jail

- 152 people were identified in the Pinellas County jail who did not disclose a permanent address at booking, representing a 77% decrease from 2023. It is important to note that the jail count methodology changed in 2024, likely resulting in the sharp decrease.

Pinellas County Schools

- Approximately 4% ($N=3,555$) of students were identified as experiencing homelessness.
- Most students experiencing homelessness shared housing with another individual/family (67%).
- Nearly 50% of students experiencing homelessness identified as Black/African American.
- Most students experiencing homelessness were between the ages of 6 to 12 (57%).

INTRODUCTION

Homelessness is a complex problem that affects every community across the United States (U.S.). In 2023, approximately 650,000 people were identified as homeless throughout the U.S., representing a nearly 10% increase from 2022 (HUD, 2023). Homelessness is associated with several public health and safety consequences including behavioral health issues (e.g., mental health disorders, substance misuse, suicide, etc.), physical disabilities, lowered life expectancy, crime (e.g., property offenses), as well as stigma and victimization (Ayano et al., 2019; Ellsworth, 2019; Tsai & Wilson, 2020). The challenges that local communities face in addressing homelessness include (1) identifying and engaging all persons at risk of homelessness, (2) diverting persons at risk of homelessness from the homeless service system, (3) reducing barriers for individuals/families entering transitional housing, emergency shelters, safe havens, and other crisis services while stable housing is secured, and (4) providing tailored assistance to ensure that stable housing can be maintained.

These issues are especially prevalent within vulnerable populations (e.g., individuals with chronic disabilities) and black, indigenous, and other people of color (BIPOC) populations. For example, data from the 2023 HUD report highlight that nearly 40% of people experiencing homelessness identified as Black, though only 13% of the U.S. population identifies as Black. Furthermore, chronic homelessness rose by 12% (HUD, 2023), suggesting that people with disabilities are underserved throughout the U.S.

Continuum of Care Model

The Homeless Continuum of Care (CoC) model was established by the Department of Housing and Urban Development (HUD) to promote partnerships between local-level providers and funders to coordinate, plan, and pursue strategies to address homelessness. Each CoC

includes an array of diverse community stakeholders/providers within a specified geographic area who work collaboratively to mitigate homelessness. CoCs across the U.S. conduct a count of sheltered and unsheltered persons experiencing homelessness, which typically occurs on a single night in January. The information collected during this count is used to determine federal funding allocations and inform strategic planning efforts at the local, state, and federal levels.

Pinellas County Continuum of Care. The Pinellas CoC, through a memorandum of understanding, has selected the Homeless Leadership Alliance of Pinellas (HLA) to serve as the lead agency, also known as the Collaborative Applicant. HLA, as the Collaborative Applicant, is required to conduct a biannual count of homeless persons within its geographic area and report findings to HUD. The Pinellas CoC elects to conduct an annual count in order to facilitate a responsive system that utilizes the most accurate data possible. Conducting an annual count also leads to increased funding opportunities for the CoC, provides key insights into the scope of homelessness (e.g., prevalence, demographics, and the needs of persons who experience homelessness), and is used to improve targeted outreach efforts and community planning initiatives.

Pinellas County, Florida

Approximately 972,852 people reside in Pinellas County, Florida. Pinellas County is the most densely populated county in Florida with nearly 3,523 persons per square mile (Office of Economic and Demographic Research, 2023). The population is mostly comprised of persons who identify as non-Hispanic, White (71.4%), which is substantially higher than the number of persons who identify as non-Hispanic, White across all of Florida (51.5%). The median housing costs are also substantially higher in Pinellas County compared to other counties within Florida. For example, the average home sale price in 2022 was \$410,000 in Pinellas County and

\$385,000 across Florida (Shimberg Center for Housing Studies, 2023). Additionally, there has been a net decline in available rental units, while the average monthly rent costs have increased (Shimberg Center for Housing Studies, 2023). Consequently, many homeowners and renters are cost-burdened (i.e., pay more than 30% of their income) and at risk of eviction/foreclosure. According to data from 2-1-1 Tampa Bay Cares, Inc., the most requested services in Pinellas County included requests for housing and shelter (211 Tampa Bay Cares, Inc., 2024).

METHODS

Data Collection

Housing Inventory Count. Sheltered data were obtained during the Housing Inventory Count (HIC). Shelter types include transitional housing (TH), emergency shelters (ES), and safe havens (SH). Shelter types also include domestic violence shelters, which are further classified as TH, ES, or SH. Data are reported to the Homeless Leadership Alliance of Pinellas (HLA) through the Homeless Management Information System (HMIS), which is used to track service utilization and demographic characteristics of persons experiencing or at risk of homelessness across Pinellas shelters. Domestic violence shelters do not utilize the HMIS but provide HLA with the requested count and demographic data.

Point in Time Count and Survey. The Point in Time Count and Survey (PIT) is used to count the number of unsheltered people experiencing homelessness. During the 2024 PIT, 395 volunteers deployed throughout Pinellas County to survey unsheltered individuals. Volunteers included local government affiliates ($n=96$, 24.30%), Department of Veteran Affairs ($n=20$, 5.06%), law enforcement and EMS/fire rescue ($n=39$, 9.87%), community-based organizations ($n=170$, 43.04%), public transit ($n=6$, 1.52%), healthcare employees ($n=4$, 1.01%), public defender's office ($n=16$, 4.05%), and unaffiliated volunteers ($n=44$, 11.14%). Volunteers utilized

electronic tablets or cell phones to complete surveys, which allowed the exact latitude/longitude coordinates of survey locations to be tracked. However, a small number of surveys were completed remotely via the phone and do not have latitude/longitude coordinates to identify the location where the survey occurred. Survey respondents were crossmatched with the HIC dataset of the sheltered population (e.g., individuals who resided in TH, ES, SH, or DVS). Individuals identified in the during the PIT who were also identified in the HIC were classified as sheltered and removed from the PIT dataset. [Appendix A](#) provides a copy of the PIT survey.

Pinellas County Jail Count. Jail data were provided by the Pinellas County Sheriff's Office (PCSO). The jail count includes individuals incarcerated on the night of January 24th, 2024, who did not disclose having a permanent residence at booking. The current jail count methodology differed from prior counts. Specifically, incarcerated individuals were excluded if they were in custody for longer than 90 days, later disclosed having an address upon release (excluding shelters or treatment centers), were transferred to the Florida Department of Corrections, or were transferred to another agency/county jurisdiction. These individuals are not considered literally homeless by HUD and are not included in the HUD homelessness count.

Pinellas County School Count. School data were provided by the Pinellas County School Board (PCSB), which monitors student homelessness. Student housing information is obtained by each school during enrollment through the Enrollment Residency Questionnaire (ERQ). The ERQ is a housing questionnaire that helps determine student eligibility for services provided through the McKinney-Vento Act. Student housing information is also obtained throughout the school year if school staff are alerted to student housing issues. All student housing information is uploaded to the Pinellas County School District's student information system, and information is updated as necessary (e.g., school social workers become alerted to

housing instability issues, etc.). Data in the current report reflects cumulative instances of housing instability identified from the beginning of the school year through January 31, 2024. Pinellas County School data are not included in the HUD homelessness count but are included in this report to provide a more comprehensive understanding of homelessness across Pinellas County.

Data Analysis

HIC, PIT, and non-HMIS sheltered data (i.e., domestic violence shelters) were inspected to remove duplicate cases. Pinellas County Jail and Pinellas County School data did not include identifiable information and could not be deduplicated from the PIT or HIC. Descriptive statistics were calculated with Microsoft Excel. Geographic information was analyzed with ArcGIS.

RESULTS

A summary of results is provided under each figure/table. Sheltered data were obtained from the Housing Inventory Count (HIC), unsheltered data were obtained from the Point in Time Count and Survey (PIT), jail data were obtained from the Pinellas County Sheriff's Office (PCSO), and school data were obtained from the Pinellas County School Board (PCSB). Jail and school data do not meet HUD inclusion criteria but are included in the report to contribute to a more comprehensive understanding of homelessness in Pinellas County. Results are organized in the following sections:

1. [Housing Inventory Count](#)
2. [Point in Time Count and Survey](#)
3. [Sheltered and Unsheltered Comparison](#)
4. [Pinellas County Jail](#)
5. [Pinellas County Schools](#)

Fig. 1. Overall Homelessness in Pinellas County, Florida

Housing Inventory Count
(N=1,389)

Point in Time Count and Survey
(N=721)

Total*
(N=2,110)

Pinellas County Jail
(N=152)

Pinellas County Schools
(N=3,555)

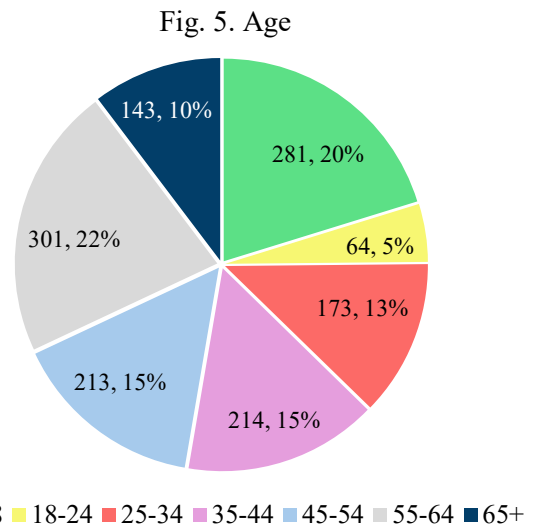

Note. Sheltered includes transitional housing (TH), emergency shelters (ES), safe havens (SH), and domestic violence shelters (DVS). HIC and PIT data were deduplicated. The total number of persons who experienced homelessness was 2,110, which equals a rate of approximately 217 per 100,000 people¹.

* Excludes the Pinellas County Jail and Pinellas County Schools.

1. $\text{Rate per 100,000} = (\text{Total Homeless} \div \text{Pinellas County Population}) \times 100,000.$

Housing Inventory Count

All Households (N=1,389)

Note. Total persons (N=1,389); total households (N=1,082). Figures 2-5 provide the demographic characteristics of all individuals who resided in a shelter at the time of the Housing Inventory Count. [Table 1](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. Most sheltered individuals were between 55-64 years and identified as White and male. [Table 2](#) provides the age groupings based on the Pinellas CoC's priority population classification scheme. [Table 3](#) provides the percent changes between 2023 to 2024.

Fig. 6. Gender

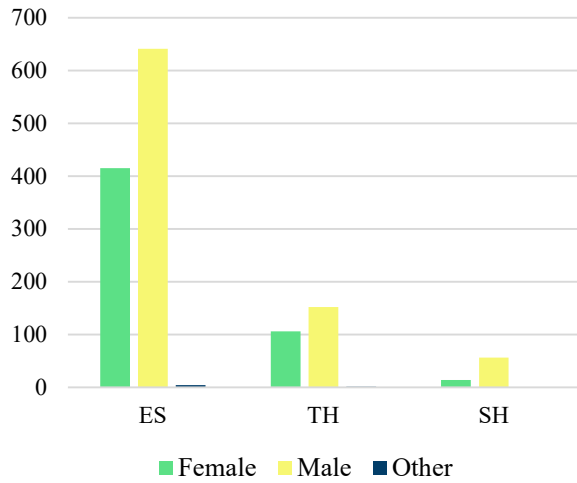

Fig. 7. Race

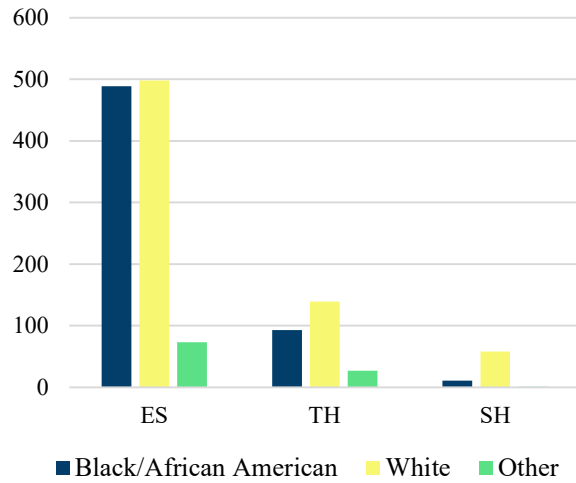

Fig. 8. Ethnicity

Fig. 9. Age

Note. Figures 6-9 provide the demographic characteristics of all individuals who resided in a shelter at the time of the Housing Inventory Count. Shelters included emergency shelters (ES; $n=1,060$), transitional housing (TH; $n=259$), and safe havens (SH; $n=70$). Most sheltered individuals resided in an emergency shelter. There was a relatively even number of individuals who identified as White or Black/African American in emergency shelters. Similarly, most individuals in emergency shelters were younger than 18 or between the ages of 55 to 64.

Households without Children (N=963)

Note. Total persons (N=963); total households (N=958). Figures 10-13 provide the demographic characteristics of individuals comprising households without children who resided in a shelter at the time of the Housing Inventory Count. [Table 4](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. [Table 5](#) provides the age groupings based on the Pinellas County CoC’s priority population classification scheme. Most individuals identified as Male and White. There was a relatively even age distribution. [Table 6](#) provides the changes between 2023 to 2024.

Fig. 14. Gender

Fig. 15. Race

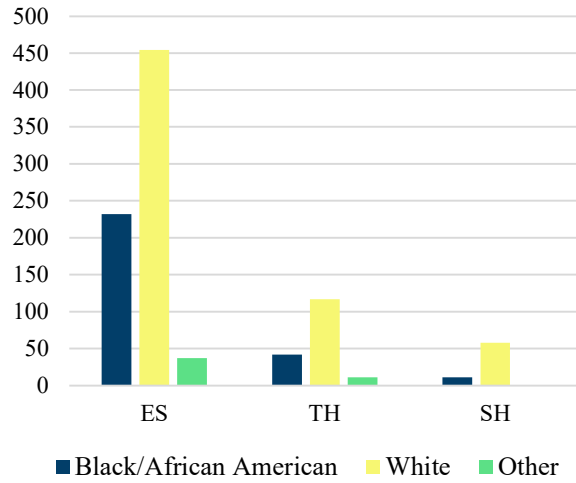

Fig. 16. Ethnicity

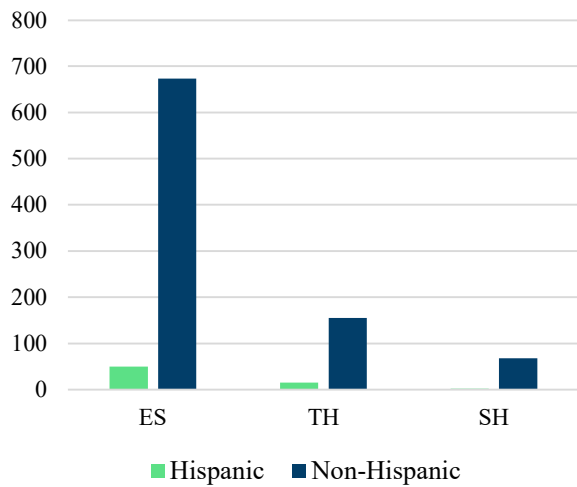

Fig. 17. Age

Note. Figures 14-17 provide the demographic characteristics of individuals comprising households without children who resided in a shelter at the time of the Housing Inventory Count. Shelters included emergency shelters (ES; $n=723$), transitional housing (TH; $n=170$), and safe havens (SH; $n=70$). Most individuals resided in emergency shelters and identified as male, White, and between the ages of 55-64.

[Table 14](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. Most Veterans identified as Male, White, and non-Hispanic. [Table 15](#) provides the age groupings based on the Pinellas County CoC’s priority population classification scheme. [Table 16](#) provides the changes between 2023 to 2024.

Fig. 41. Gender (Veterans Only)

Fig. 42. Race (Veterans Only)

Fig. 43. Ethnicity (Veterans Only)

Note. Figures 41-43 provide the demographic characteristics of individuals comprising Veteran households without children. Shelters included emergency shelters (ES; $n=81$), transitional housing (TH; $n=49$), and safe havens (SH; $n=48$). Most individuals resided in emergency shelters and identified as male, White, and between the ages of 55-64. A significantly higher number of veterans in transitional housing and safe havens identified as White.

Parenting Youth Households, Younger than 25 (N=19)

Fig. 44. Gender (Youth Parents Only)

■ Female ■ Male ■ Other

Fig. 45. Race (Youth Parents Only)

■ Black/African American ■ White ■ Other

Fig. 46. Ethnicity (Youth Parents Only)

■ Hispanic ■ Non-Hispanic

Fig. 47. Age (Youth Parents Only)

■ <18 ■ 18-24

Note. Total persons (N=44); youth parents (N=19); total households (N=19). Parenting youth refer to persons younger than 25 who are the parent or legal guardian of one or more children (younger than 18) who are present with or sleeping in the same place as the youth parent. This category includes both minors (under 18) and young adults (18-24). Figures 44-47 provide the demographic characteristics of individuals comprising parenting youth households. [Table 17](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. All youth parents identified as female and most identified as Black/African American. [Table 18](#) provides the changes between 2023 to 2024.

Fig. 48. Gender (Youth Parents Only)

Fig. 49. Race (Youth Parents Only)

Fig. 50. Ethnicity (Youth Parents Only)

Fig. 51. Age (Youth Parents Only)

Note. Figures 48-51 provide the demographic characteristics of individuals comprising parenting youth households. Shelters included emergency shelters (ES; $n=6$), transitional housing (TH; $n=13$). No parenting youth resided in a safe haven (SH). All parenting youth younger than 18 resided in transitional housing.

Unaccompanied Youth Households, Younger than 25 (N=29)

Fig. 52. Gender

■ Female ■ Male ■ Other

Fig. 53. Race

■ Black/African American ■ White ■ Other

Fig. 54. Ethnicity

■ Hispanic ■ Non-Hispanic

Fig. 55. Age

■ <18 ■ 18-24

Note. Total persons (N=29); total households (N=29). Figures 52-55 provide the demographic characteristics of individuals comprising unaccompanied youth households. Unaccompanied youth refer to persons younger than 25 who are not part of a family or accompanied by their parent or guardian during their experience of homelessness. This category includes both minors (under 18) and young adults (18-24). [Table 19](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. There was a relatively even proportion of unaccompanied youth who identified as male and female, while the majority identified as Black/African American. [Table 20](#) provides the changes between 2023 to 2024.

Fig. 56. Gender

Fig. 57. Race

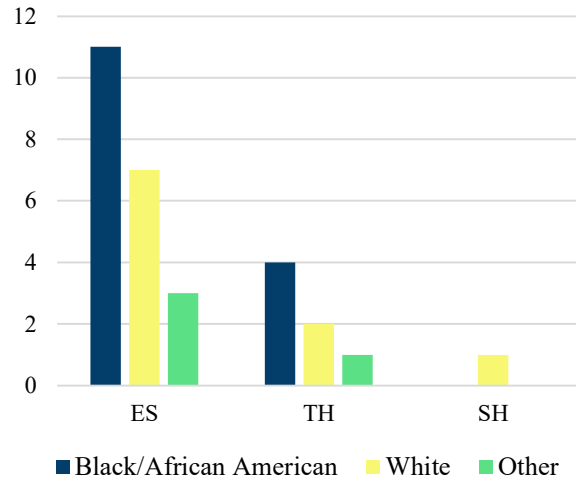

Fig. 58. Ethnicity

Fig. 59. Age

Note. Figures 56-59 provide the demographic characteristics of individuals comprising unaccompanied youth households. Shelters included emergency shelters (ES; $n=21$), transitional housing (TH; $n=7$), and safe havens (SH; $n=1$). Most unaccompanied youth resided in an emergency shelter.

Domestic Violence Shelters, Households with at least one Adult and one Child (N=89)

Fig. 71. Age

■ 25-34 ■ 35-44 ■ 45-54 ■ 55-64 ■ 65+

Note. Total persons (N=89); total households (N=29). Figures 68-71 provide the demographic characteristics of individuals within domestic violence shelters comprising households without children. [Table 23](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. Most individuals identified as female, while a similar proportion of individuals identified as Black/African American and White. [Table 24](#) provides the changes between 2023 to 2024.

Fig. 72. Gender

Fig. 73. Race

Fig. 74. Ethnicity

Fig. 75. Age

Note. Figures 72-75 provide the demographic characteristics of individuals within domestic violence shelters comprising households without children. All individuals resided in an emergency shelter (ES; (N=16)). No individuals resided in transitional housing (TH) or safe havens (SH).

Chronic Homelessness

Fig. 76. All Households (N=1,389)

■ Chronic ■ Not Chronic

Fig. 77. Households with at least one Adult and one Child (N=410)

■ Chronic ■ Not Chronic

Fig. 78. Households without Children (N=963)

■ Chronic ■ Not Chronic

Fig. 79. Veteran Households without Children (N=178)

■ Chronic ■ Not Chronic

Fig. 80. Unaccompanied Youth Households (N=29)

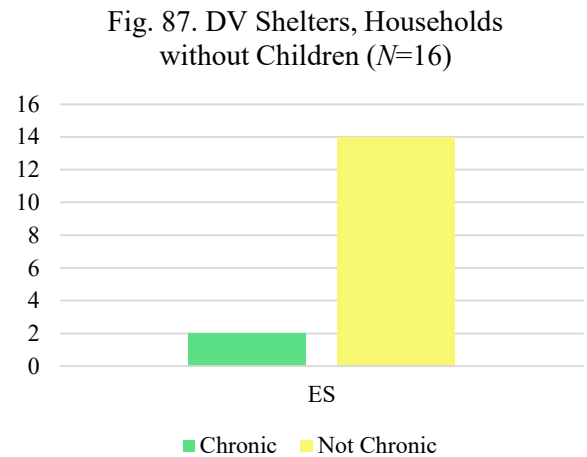

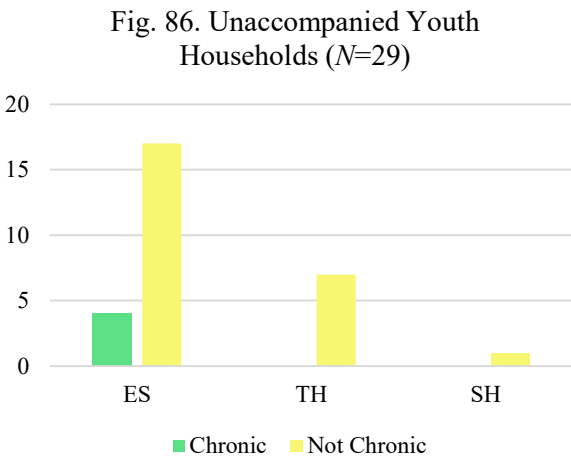

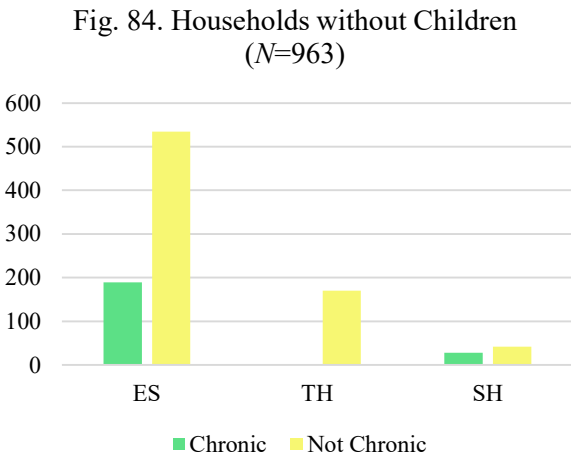

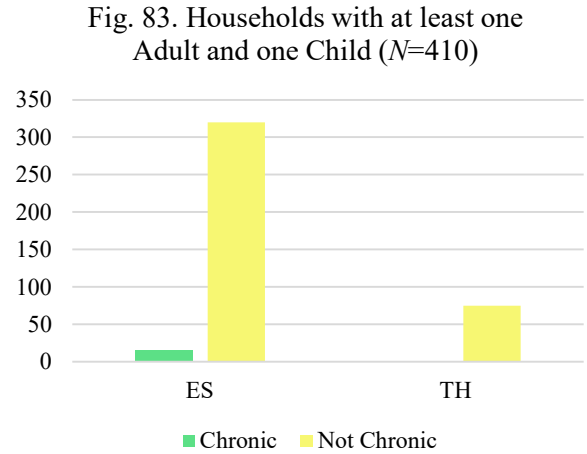

■ Chronic ■ Not Chronic

Fig. 81. DV Shelters, Households without Children (N=16)

■ Chronic ■ Not Chronic

Note. Figures 78-81 provide the proportion of chronic homelessness across households with a chronically homeless population. The highest proportion of chronic homelessness occurred in households without children. Households without children had the largest proportion of chronically homeless individuals. See [Key Terms](#) for the definition of chronic homelessness.

Note. Figures 82-87 provide the proportion of chronic homelessness across household and shelter types. Most chronically homeless individuals resided in emergency shelters (ES). Therefore, it is crucial to ensure these shelters are adequately funded and equipped to provide low barrier housing and comprehensive support service such as access to mental health care, substance abuse treatment, physical health care, job training programs, and other social services that can help individuals transition to more stable housing situations.

Subpopulation Data

Fig. 88. Adults with a Serious Mental Illness

■ Yes ■ No

Fig. 89. Adults with a Substance Use Disorder

■ Yes ■ No

Fig. 90. Adults with HIV/AIDS

■ Yes ■ No

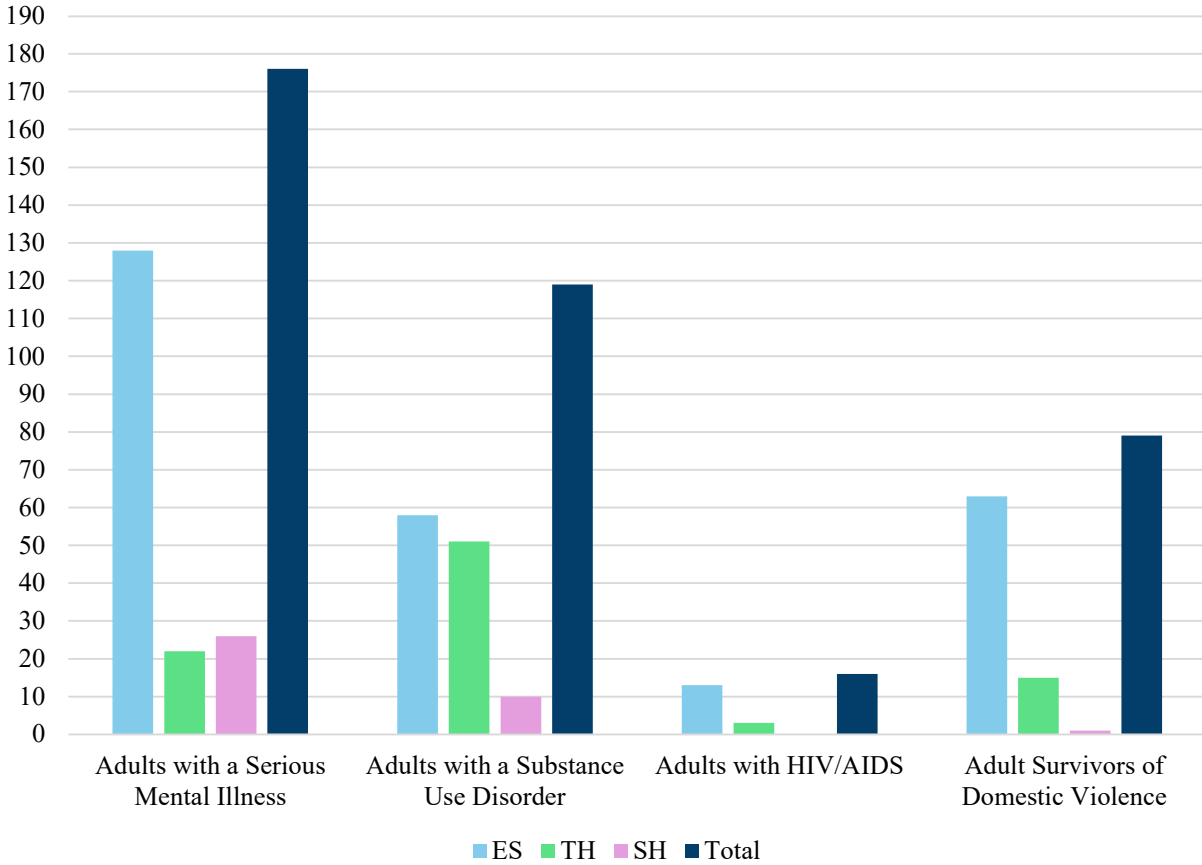

Fig. 91. Adults Survivors of Domestic Violence

■ Yes ■ No

Note. Figures 88-91 only include adults (i.e., persons 18 years old or older). Percentages were calculated by dividing the total number of adults for each subpopulation characteristic by the total number of sheltered adults ($N=1,108$). All data are self-reported and do not represent official diagnoses. Subpopulation data categories are not mutually exclusive (e.g., a person may have a mental illness and a co-occurring substance use disorder). Approximately 16% of adults reported a serious mental illness. [Table 25](#) provides the raw data.

Fig. 92. Subpopulation Data by Housing Type (N=1,108)

Note. Figure 92 only includes adults (i.e., persons 18 years old or older). All data are self-reported and do not represent official diagnoses. Subpopulation data is not mutually exclusive (e.g., a person may have a mental illness and a co-occurring substance use disorder). A similar number of individuals who reported a substance use disorder resided in an emergency shelter (ES) and transitional housing (TH). Furthermore, a similar number of individuals with a serious mental illness resided in transitional housing and a safe haven (SH), though the majority of persons with a serious mental illness, substance use disorder, and/or survivors of domestic violence resided in emergency shelters. [Table 25](#) provides the raw data.

Sheltered Population Trends by Shelter Type (2016-2024)

Fig. 93. Total Count by Shelter Type

Note. Figure 93 provides the sheltered population trends by shelter type. The Point in Time Count and Survey was not conducted in 2021 due to COVID-19. There was a slight decrease in the number of sheltered individuals identified in 2024. Transitional housing and safe haven trends have remained relatively stable over time.

All Shelter Type Trends (2016-2024)

Fig. 94. Gender Trends (2016-2024)

Fig. 95. Race Trends (2016-2024)

Fig. 96. Ethnicity Trends (2016-2024)

Fig. 97. Age Trends (2016-2024)

Note. Figures 94-97 provide the demographic characteristics of all sheltered individuals between 2016-2024. The Point in Time Count and Survey was not conducted in 2021 due to COVID-19. Age, gender, and race were stratified to maintain consistency with previous Point in Time Count reports. The number of sheltered individuals who identify as Black/African American has remained relatively steady between 2016, while the number of sheltered individuals who identify as White has decreased. These trends suggest that homelessness remains a major obstacle for individuals who identify as Black/African American. Therefore, it is necessary to adopt and scale up strategies that address systemic inequities in housing, employment, and education. Furthermore, fair housing laws should be enforced to prevent discriminatory practices by landlords and lenders. [Table 26](#) provides the raw data.

Emergency Shelter Trends (2016-2024)

Fig. 98. Gender Trends (2016-2024)

Fig. 99. Race Trends (2016-2024)

Fig. 100. Ethnicity Trends (2016-2024)

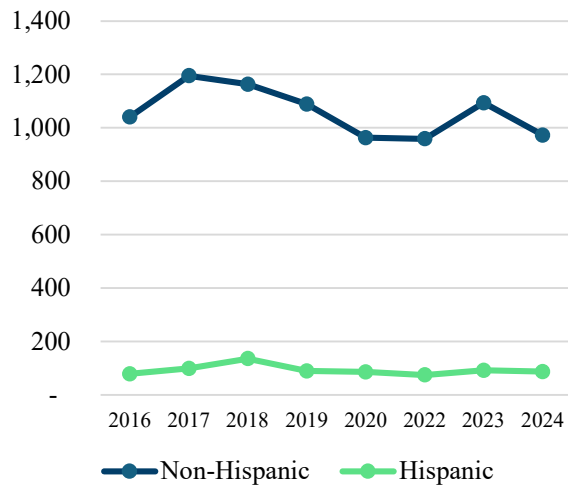

Fig. 101. Age Trends (2016-2024)

Note. Figures 98-101 provide the demographic characteristics of all individuals identified in emergency shelters between 2016-2024. The Point in Time Count and Survey was not conducted in 2021 due to COVID-19. Age, gender, and race were stratified to maintain consistency with previous Point in Time reports. The number of individuals who identify as White has steadily decreased since 2017. [Table 27](#) provides the raw data.

Transitional Housing Trends (2016-2024)

Fig. 102. Gender Trends (2016-2024)

Fig. 103. Race Trends (2016-2024)

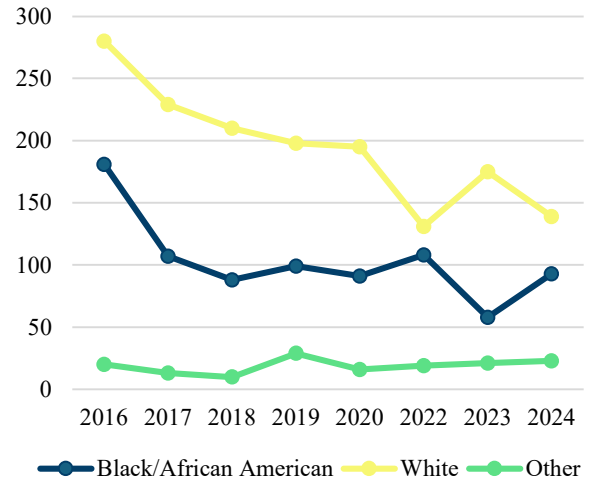

Fig. 104. Ethnicity Trends (2016-2024)

Fig. 105. Age Trends (2016-2024)

Note. Figures 102-105 provide the demographic characteristics of all individuals identified in transitional housing between 2016-2024. The point in time count was not conducted in 2021 due to COVID-19. Age, gender, and race were stratified to maintain consistency with previous Point in Time reports. The number of individuals who identify as male increased in 2024, while the number of individuals who identify as female increased. Furthermore, the number of individuals who identify as White decreased, while the number of individuals who identify as Black/African American increased. [Table 28](#) provides the raw data.

Safe Haven Trends (2016-2024)

Fig. 106. Gender Trends (2016-2024)

Fig. 107. Race Trends (2016-2024)

Fig. 108. Ethnicity Trends (2016-2024)

Fig. 109. Age Trends (2016-2024)

Note. Figures 106-109 provide the demographic characteristics of all individuals identified in safe havens between 2016-2024. The Point in Time Count and Survey was not conducted in 2021 due to COVID-19. Age, gender, and race were stratified to maintain consistency with previous Point in Time reports. The number of individuals who identify as male, female, White, and non-Hispanic has steadily increased since 2022. However, the number of individuals who identify as Black/African American sharply decreased between 2023 and 2024. [Table 29](#) provides the raw data.

Provider Counts

Fig. 110. Housing Provider Organizations

Note. Figure 110 provides the total count of individuals by housing provider organization. Each organization may have different shelter types. Overall, St. Vincent de Paul CARES sheltered the most individuals.

Fig. 111. Emergency Shelters

Fig. 112. Transitional Housing

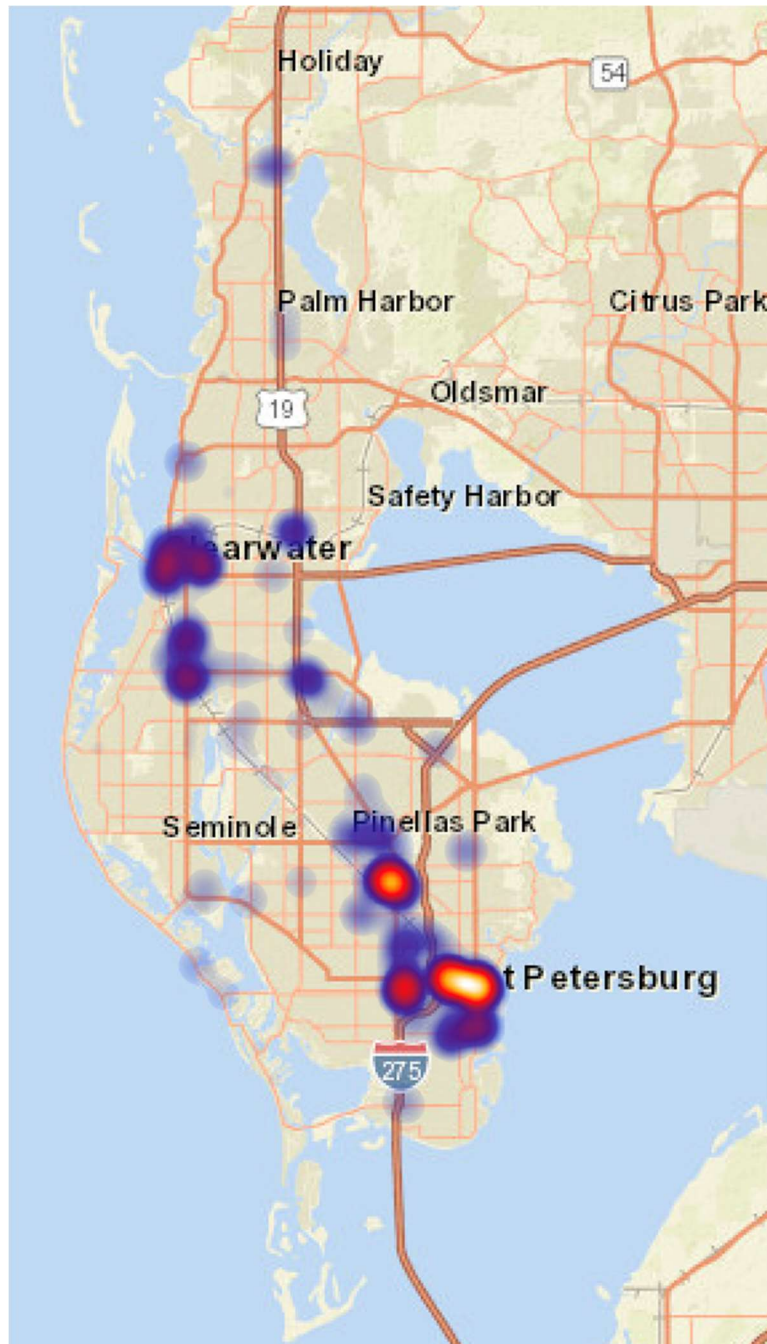

Fig. 113. Safe Havens

Note. Figures 111-113 provides the total count of each shelter type by housing provider organization. See [Table 30](#), [Table 31](#), and [Table 32](#) provide the complete list of providers by shelter type. The HMIS Lead Agency verified with Bay Pines VA Healthcare System (5/28/2024), that St. Vincent de Paul CARES Low Demand is categorized as Transitional Housing. Moving forward this program will no longer be reported as a Safe Haven project for PIT reporting. PIT and HIC were submitted on 5/9/2024 which was prior to knowledge of this project type change for 2024.

Point in Time Count and Survey

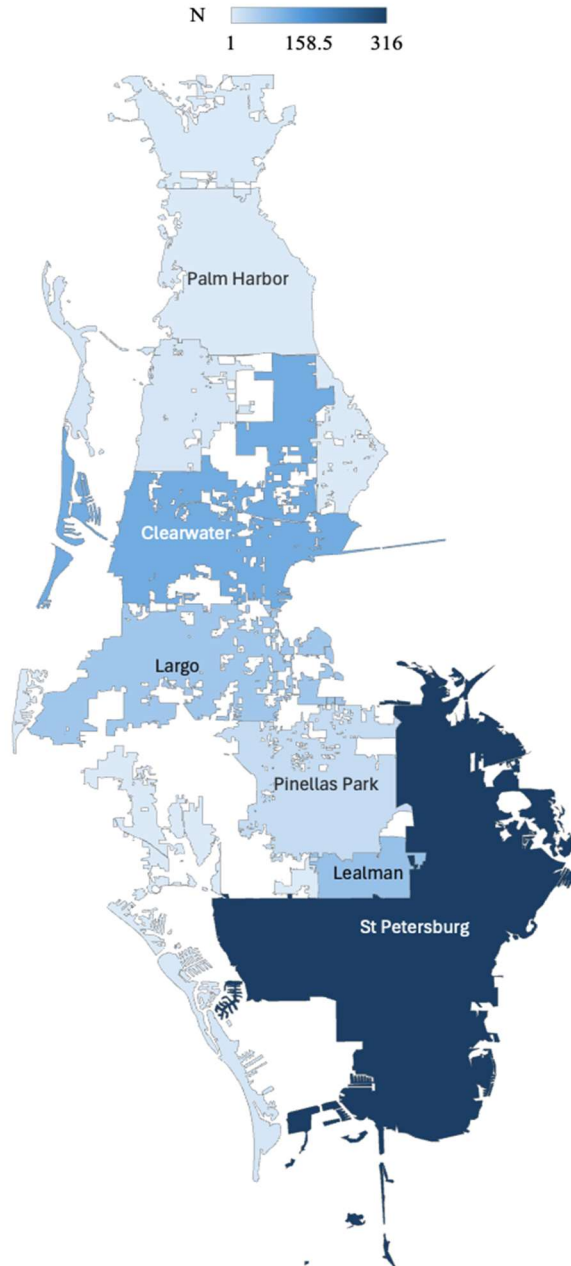

Fig. 114. Heat Map of Unsheltered Homeless Population in Pinellas County, FL (N=721)

Note. Figure 114 provides a heatmap of unsheltered individuals within Pinellas County as identified during the 2024 Point in Time Count. Darker areas represent a higher proportion of unsheltered individuals. Surveys completed telephonically are excluded from the map ($N=51$). The following link provides an interactive cluster map with this link: [Clustered Map](#). Additional interactive maps will be made available at <https://www.pinellashomeless.org/pitdata>.

Fig. 115. Frequent Area of Stay by Municipality (N=637)

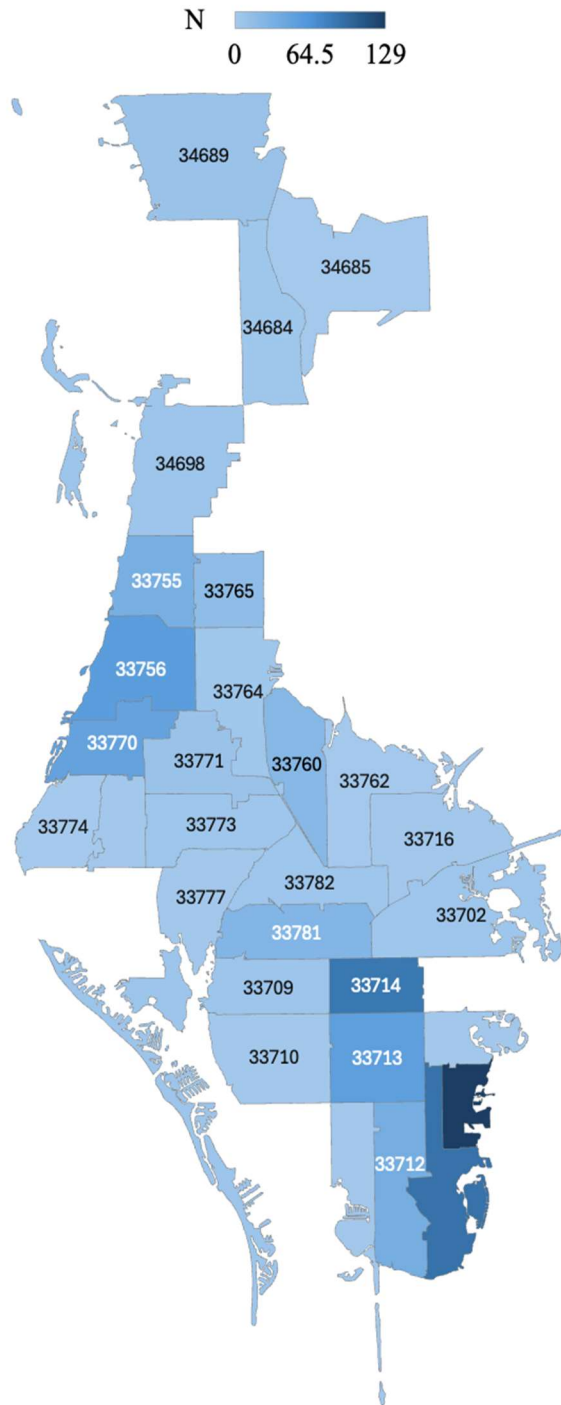

Municipality	N	%
St. Petersburg	316	49.61%
Clearwater	117	18.37%
Lealman	76	11.93%
Largo	66	10.36%
Pinellas Park	27	4.24%
St. Pete Beach	9	1.41%
Dunedin	8	1.26%
Treasure Island	6	0.94%
Tarpon Springs	3	0.47%
Palm Harbor	2	0.31%
Safety Harbor	2	0.31%
Seminole	2	0.31%
Indian Rocks Beach	1	0.16%
Kenneth City	1	0.16%
Madeira Beach	1	0.16%

Note. Figure 115 provides the municipality where unsheltered Point in Time survey respondents identified as their frequent area of stay (see Appendix A). Data are self-reported, and respondents were not required to answer all questions. Therefore, 80 individuals did not report their frequent area of stay. Additionally, four individuals listed their frequent area of stay as a municipality outside of Pinellas County. Percentages were calculated by dividing the count of each municipality by 637. Most unsheltered individuals reported that they spent the majority of their time in St. Petersburg. Table 65 provides the 2018-2024 trends.

Fig. 116. Unsheltered Count by Zip Code (N=670)

Zip Code	N	%
33701	129	19.25%
33705	90	13.43%
33714	86	12.84%
33756	54	8.06%
33713	52	7.76%
33770	47	7.01%
33712	35	5.22%
33755	33	4.93%
33781	25	3.73%
33760	22	3.28%
33765	16	2.39%
33771	8	1.19%
34689	8	1.19%
33706	6	0.90%
33708	6	0.90%
33709	6	0.90%
34698	6	0.90%
33702	5	0.75%
33773	5	0.75%
33782	5	0.75%
33764	4	0.60%
34684	4	0.60%
33710	3	0.45%
33716	3	0.45%
33704	2	0.30%
33711	2	0.30%
33777	2	0.30%
33778	2	0.30%
33731	1	0.15%
33762	1	0.15%
33774	1	0.15%
34685	1	0.15%

Note. Figure 116 reflects the zip code where surveys were administered. Zip codes do not reflect the frequent area of stay. There were 51 surveys administered via the phone. Geolocation data were not tracked for surveys administered via the phone and are excluded from analysis. Most Point in Time Count surveys were administered in the 33701-zip code, which is within the City of St. Petersburg.

All Households (N=721)

Fig. 117. Gender

Female Male Other

Fig. 118. Race

Black/African American White Other

Fig. 119. Ethnicity

Fig. 130. Race

Fig. 131. Ethnicity

Note. Figures 129-131 provide the demographic characteristics of individuals within households comprising of children younger than 18. [Table 33](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. All individuals identified as male, Black/African American, and non-Hispanic. [Table 40](#) provides the changes between 2023 to 2024. [Table 41](#) provides the age groupings based on the Pinellas CoC’s priority population classification scheme.

Veteran Households with at least one Adult and one Child (N=4)

Fig. 132. Gender

Fig. 133. Race

Fig. 134. Ethnicity

Note. Figures 132-134 provide the demographic characteristics of individuals within Veteran households comprising at least one adult and one child. [Table 33](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. There was an even number of Veterans who identified as male and female. Most Veterans identified as White, and all identified as non-Hispanic. [Table 42](#) provides the changes between 2023 to 2024. [Table 43](#) provides the age groupings based on the Pinellas CoC’s priority population classification scheme.

Veteran Households without Children (N=53)

Fig. 135. Gender

Fig. 136. Race

Fig. 137. Ethnicity

Note. Figures 135-137 provide the demographic characteristics of individuals within Veteran households without children. [Table 33](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. Most Veterans identified as male and White, while all Veterans identified as non-Hispanic. [Table 44](#) provides the changes between 2023 to 2024. [Table 45](#) provides the age groupings based on the Pinellas CoC’s priority population classification scheme.

Parenting Youth Households, Younger than 25 (N=2)

Fig. 138. Gender

■ Female ■ Male ■ Other

Fig. 139. Race

■ Black/African American ■ White ■ Other

Fig. 140. Ethnicity

■ Hispanic ■ Non-Hispanic

Fig. 141. Age

■ <18 ■ 18-24

Note. Figures 138-141 provide the demographic characteristics of individuals within parenting youth households. Parenting youth refer to persons younger than 25 who are the parent or legal guardian of one or more children (younger than 18) who are present with or sleeping in the same place as the youth parent. This category includes both minors (under 18) and young adults (18-24). [Table 33](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. All parenting youth identified as female. An even proportion of parenting youth identified as Black/African American and White, and Hispanic and non-Hispanic. All parenting youth were between 18 to 24 years old. [Table 46](#) provides the changes between 2023 to 2024.

Unaccompanied Youth Households, Younger than 25 (N=24)

Fig. 142. Gender

■ Female ■ Male ■ Other

Fig. 143. Race

■ Black/African American ■ White ■ Other

Fig. 144. Ethnicity

■ Hispanic ■ Non-Hispanic

Fig. 145. Age

■ <18 ■ 18-24

Note. Figures 142-145 provide the demographic characteristics of individuals within unaccompanied youth households. Unaccompanied youth refer to persons younger than 25 who are not part of a family or accompanied by their parent or guardian during their experience of homelessness. This category includes both minors (under 18) and young adults (18-24). [Table 33](#) provides a complete description of all demographic characteristics to reflect current HUD reporting guidelines. Most unaccompanied youth identified as male, White, non-Hispanic, and between the ages of 18-24. [Table 47](#) provides the changes between 2023 to 2024. [Table 48](#) provides the age groupings based on the Pinellas CoC's priority population classification scheme.

Chronic Homelessness

Fig. 146. All Households (N=721)

■ Chronic ■ Not Chronic

Fig. 147. Households without Children (N=614)

■ Chronic ■ Not Chronic

Fig. 148. Households with at least one Adult and one Child (N=105)

■ Chronic ■ Not Chronic

Fig. 149. Households with Children Younger than 18 (N=2)

■ Chronic ■ Not Chronic

Note. Figures 146-149 provide the proportion of chronically homeless individuals by household type. Households with at least one adult and one child had the largest proportion of chronically homeless individuals. This suggests a need to enhance integrated case management services to assist families in navigating cross-system and complex services (e.g., housing support, family support, education/workforce development, etc.). Rapid rehousing and permanent supportive housing are essential to expanding support services and transitioning families from homelessness to stable housing.

Fig. 150. Veteran Households with at least one Adult and one Child (N=4)

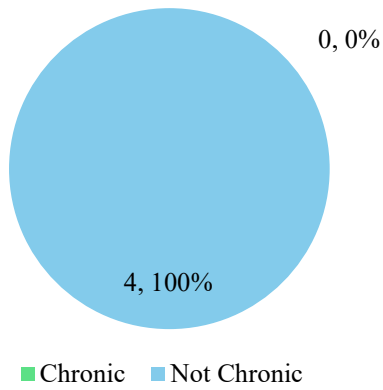

Fig. 151. Veteran Households without Children (N=53)

Fig. 152. Parenting Youth Households (N=2)

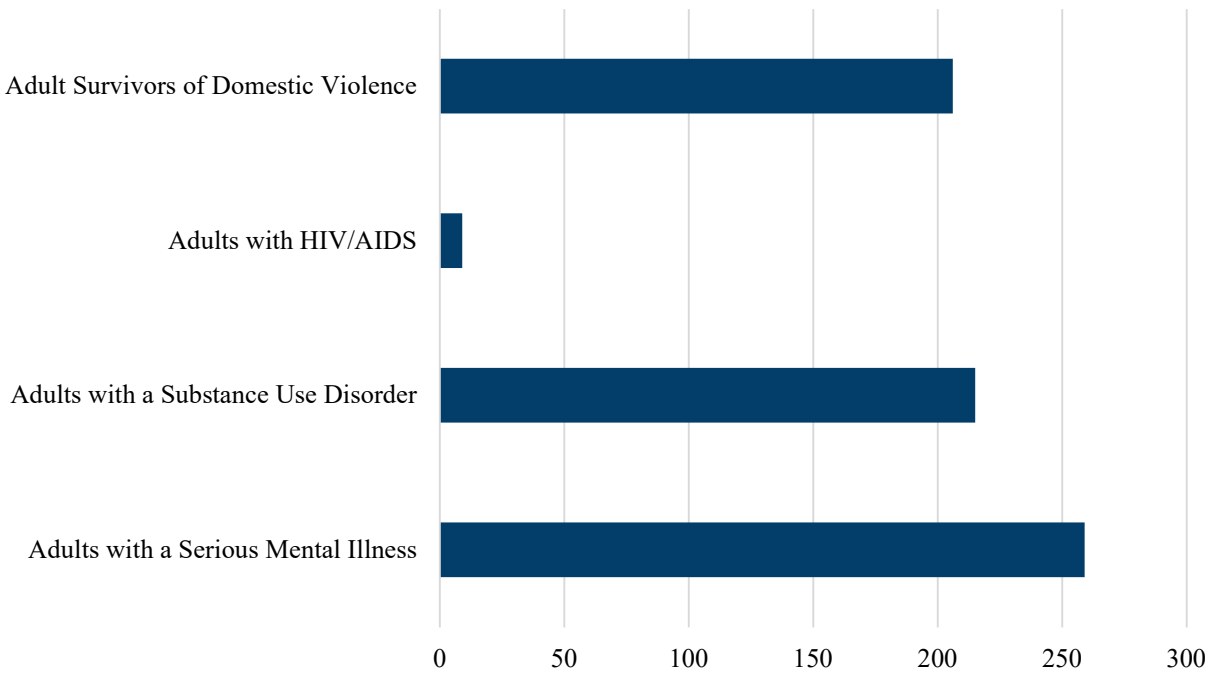

Fig. 153. Unaccompanied Youth Households (N=24)

Note. Figures 150-153 provide the proportion of chronically homeless individuals by household type. There were not any chronically homeless individuals identified in Veteran households with at least one adult and one child, parenting youth households, and unaccompanied youth households.

Subpopulation Data

Fig. 154. Subpopulation Data

Note. Figure 154 provides the subpopulation data. Data are self-reported and are not mutually exclusive (e.g., individuals could report multiple categories). Approximately 40% of unsheltered adults ($n=259$) reported a serious mental illness. Though specific diagnoses are not included, this indicates a need to deploy trained behavioral health professionals to conduct regular outreach with unsheltered individuals to enhance access to care. Furthermore, increasing the number of permanent supportive housing beds to transition unsheltered individuals to stable housing may reduce the cost burden associated with emergency hospitalizations due to a psychiatric emergency, criminal justice system involvement, and other crisis interventions. [Table 49](#) provides the raw data.

Additional Characteristics

Fig. 155. Jail

Fig. 156. Education

Fig. 157. Sexual Orientation

Fig. 158. Military

Note. Figures 155-158 provide additional demographic characteristics of the unsheltered population. [Table 50](#) provides a complete description of the demographic characteristics and 2023-2024 changes. [Appendix A](#) provides the Point in Time Count survey used to obtain these characteristics. Most unsheltered individuals reported high school or equivalent as their highest level of education. A similar number reported less than 12th grade or some college as their highest level of education, suggesting that factors other than a lack of education might be contributing to their homelessness, such as economic challenges, lack of affordable housing, health issues, or other social determinants. Incarceration history was added to the Point in Time survey in 2024. Approximately 36% ($n=259$) reported that they had been incarcerated in the past year. This will be a key metric to track longitudinally to measure changes in criminal justice system trajectories following legislative changes related to “anti-camping” regulations.

Fig. 159. Alcohol Use Disorder

■ Yes ■ No ■ Not Reported

Fig. 160. Mental Health Disorder

■ Yes ■ No ■ Not Reported

Fig. 161. Drug Use Disorder

■ Yes ■ No ■ Not Reported

Fig. 162. Survivor of Domestic Violence

■ Yes ■ No ■ Not Reported

Note. Figures 159-162 provide additional demographic characteristics of the unsheltered population. [Table 50](#) provides a complete description of the demographic characteristics and 2023-2024 changes. [Appendix A](#) provides the Point in Time Count survey used to obtain these characteristics. A substantial portion of unsheltered individuals reported a behavioral health issue (e.g., substance use or mental health issues) or that they are survivors of domestic violence.

Fig. 163. Chronic Health Condition

■ Yes ■ No ■ Not Reported

Fig. 164. HIV/AIDS

■ Yes ■ No ■ Not Reported

Fig. 165. Developmental Disability

■ Yes ■ No ■ Not Reported

Fig. 166. Physical Disability

■ Yes ■ No ■ Not Reported

Note. Figures 163-166 provide additional demographic characteristics of the unsheltered population. [Table 50](#) provides a complete description of the demographic characteristics and 2023-2024 changes. [Appendix A](#) provides the Point in Time Count survey used to obtain these characteristics. Approximately 30% of unsheltered individuals reported a physical disability, while nearly 40% reported a chronic health issue. Mobile medical units should target unsheltered hotspots identified in this report to facilitate access to care. Furthermore, increasing the number of available medical respite beds may help provide necessary recovery time and reduce the strain on emergency services, ultimately improving health outcomes and enhancing the overall quality of life for these individuals. This can reduce the long-term healthcare costs associated with untreated chronic conditions and frequent emergency room visits.

Fig. 167. Formerly in Foster Care

■ Yes ■ No ■ Not Reported

Note. Figures 163-166 provide additional demographic characteristics of the unsheltered population. [Table 50](#) provides a complete description of the demographic characteristics and 2023-2024 changes. [Appendix A](#) provides the Point in Time Count survey used to obtain these characteristics. Approximately 64% of unsheltered individuals reported having access to health services.

Fig. 171. Time Spent Unhoused

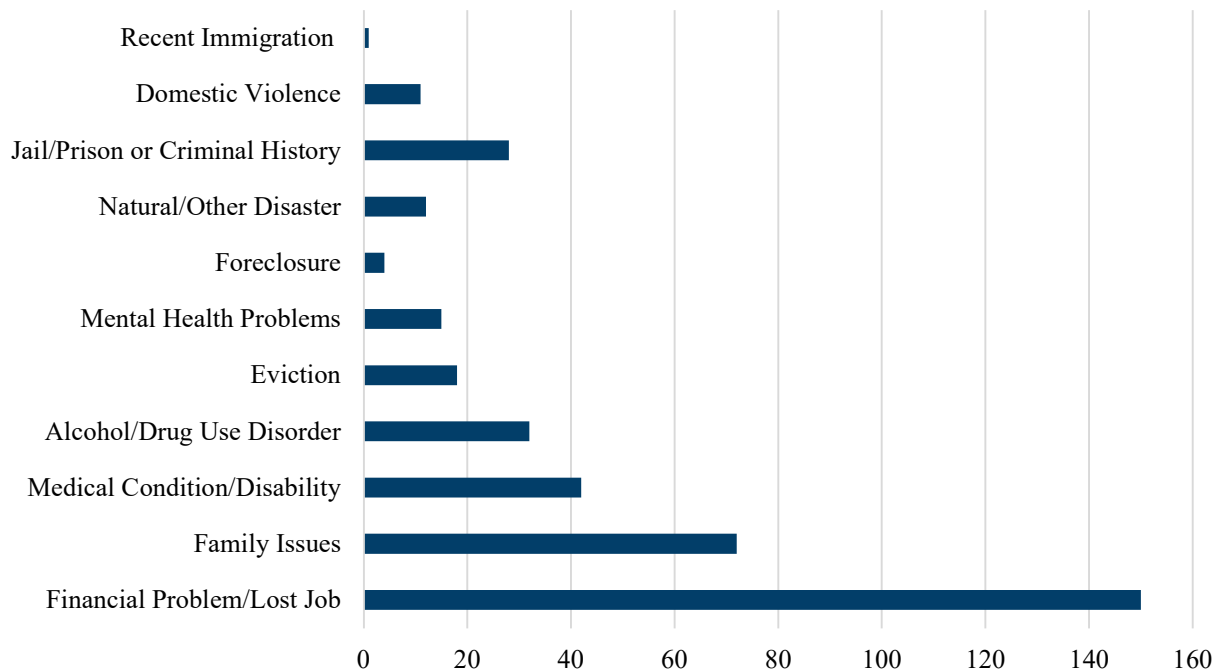

Fig. 172. Primary Reason for Lost Housing

Note. Figures 171-172 provide the number of time (in years) spent unhoused and primary reasons that housing was lost of the unsheltered population. The average number of days unhoused was 1,443 days or approximately four years. [Table 50](#) provides a complete description of the demographic characteristics. [Appendix A](#) provides the Point in Time Count survey used to obtain these characteristics. [Table 51](#) provides the primary reasons for losing housing between 2016 to 2024. The top three reasons that housing was lost involved financial problems, family issues, and medical conditions/disabilities.

Unsheltered Trends (2016-2024)

Fig. 173. Total Number of Unsheltered Persons

Note. Data were not collected in 2021 due to COVID-19. The unsheltered count has started to trend upwards. [Table 52](#) provides the raw data. [Table 53](#) provides the trends per municipality.

Fig. 174. Gender Trends (2016-2024)

Fig. 175. Race Trends (2016-2024)

Fig. 176. Ethnicity Trends (2016-2024)

Fig. 177. Age Trends (2016-2024)

Note. Figures 174-177 provide the demographic trends for all household types. The number of individuals younger than 18 has remained relatively stable, though started to trend upward in 2024. [Table 52](#) provides the raw data.

Figure 220. Jail Count by Zip Code

Note. Figure 220 provides the total number of individuals in the Pinellas County Jail on the night of the Point in Time Count. Individuals were excluded from the count if they were custody longer than 90 days, disclosed a permanent address upon release (excluding shelters or treatment centers), transferred to state prison, or transferred to another county or jurisdiction. Some zip codes are excluded from the map due to space limitations. Safe Harbor emergency shelter, operated by the Pinellas County Sheriff's Office, is located next to the Pinellas County Jail and within the 33762-zip code, which may account for the larger proportion of persons who reported they resided in that geographic region. Zip codes refer to the zip code of the location that the individual was arrested in.

Fig. 221. Jail Population

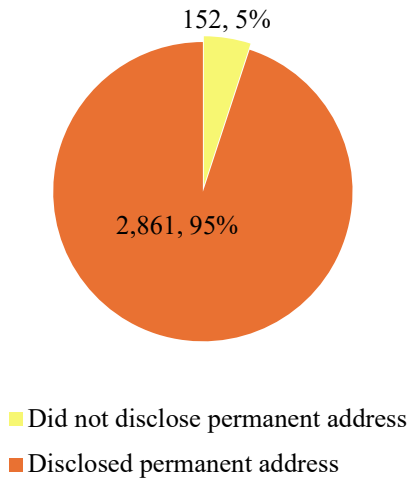

Fig. 222. Age

Fig. 223. Gender

Fig. 224. Race

Note. Figures 221-224 provide the demographic characteristics of individuals in jail. Demographic characteristics were provided by the Pinellas County Sheriff's Office. HUD does not specify methodologies for jail data collection for the PIT count. Most individuals identified as White, male, and between the ages of 35 to 44. [Table 62](#) and [Table 63](#) provide the raw data.

Fig. 225. Race Trends (2016-2024)

Fig. 226. Gender Trends (2016-2024)

Fig. 227. Total Jail Trends (2016-2024)

Note. Figures 225-227 provide the Pinellas County Jail trends. [Table 63](#) provides the raw data. The 2024 count excluded individuals if they were custody longer than 90 days, disclosed a permanent address upon release (excluding shelters or treatment centers), transferred to state prison, or transferred to another county or jurisdiction. Prior years did not utilize this methodology, which likely explains the sharp decrease of incarcerated individuals.

Pinellas County School Data

Students (All Ages)

Fig. 228. Any Homelessness

Pinellas County School Trends (2016-2024)

Fig. 252. Housing Trends (Younger than 18)

Fig. 253. Housing Trends (18 and Older)

Figures 252-253 provide the 2016-2024 trends. Data was not collected in 2021 due to COVID-19. There has been a steady and significant downward trend in students 18 and older sharing housing with another individual. Other housing trends have remained steady over time. [Table 65](#) provides the raw data.

DISCUSSION

The 2024 Point in Time Count identified 2,110 people who were experiencing sheltered ($n=1,389$) and unsheltered ($n=721$) homelessness in Pinellas County. This represents a 7% decrease in the sheltered count and a 12% increase in the unsheltered count compared to 2023. The increased unsheltered count may be attributed to the weather or volunteer deployments. For example, the 2023 count was affected by inclement weather, which made it more challenging to locate people experiencing unsheltered homelessness. Moreover, approximately 50 more volunteers participated in the unsheltered count in 2024 compared to 2023, and volunteers were informed by the 2023 report, which provided hotspot analyses to target deployments.

In addition to the Point in Time Count, 3,555 Pinellas County students were identified as experiencing homelessness and 152 persons in the Pinellas County Jail did not disclose a permanent address upon booking. Compared to 2023, there was a 6% decrease in the number of Pinellas County students and 77% decrease in the number of individuals in the Pinellas County Jail identified as experiencing homelessness. The drastic decrease in the Pinellas County Jail count is largely attributed to the methodological change in how individuals in the Pinellas County Jail were counted (see [Data Collection](#)).

Racial disparities remained evident, especially across vulnerable populations. For example, approximately 75% of unsheltered and sheltered individuals comprising households with at least one adult and one child identified as Black/African American. Furthermore, most students identified by the Pinellas County School Board as experiencing homelessness identified as Black/African American. Therefore, efforts should continue to focus on reducing barriers for minority populations across the Pinellas CoC.

Limitations

Several limitations to this report are noted. First, the unsheltered and sheltered counts represent a single point in time, and are not a completely accurate representation of homelessness, which tends to fluctuate throughout the year. Second, the unsheltered count included approximately 400 volunteers, who conducted a physical count within Pinellas County. Although these volunteers were trained by the Homeless Leadership Alliance of Pinellas, Inc. and represent stakeholders who are familiar with Pinellas County, it is not possible to search all regions or to count all individuals experiencing unsheltered homelessness. For example, hotspot analyses revealed several areas that did not include any people experiencing unsheltered homelessness. It is unclear if this is because there were no unsheltered persons in these locations, if volunteers were unable to communicate with unsheltered individuals, or if there were too few volunteers to reach all areas. Furthermore, many volunteers represented police and fire department officials and government employees. It is possible that certain characteristics (e.g., substance use) are under-reported due to fear of legal sanctions or perceived power imbalances.

Recommendations

Recommendation #1: Coordinate street outreach to target support services.

Compared to 2023, there was an 8% increase in unsheltered individuals who reported a chronic health condition, a 7% increase in unsheltered individuals who reported a mental health condition, and a 25% increase in unsheltered individuals who reported substance use disorders. However, 22% of unsheltered individuals denied having access to health services in 2024. It is important for street outreach teams to target these vulnerable populations to increase access to critical physical and behavioral health support services.

Currently, several street outreach teams operate within Pinellas County. These outreach teams mostly operate independently and lack a coordinated approach to address key health-related issues. Organizations should coordinate outreach efforts to ensure comprehensive resource allocation and collaborate to improve targeted case management services. A centralized system for coordinating outreach will improve outreach and prevent duplicated services, thereby optimizing care coordination throughout the County. This can be facilitated through increased participation in HMIS and regular Street Outreach Provider Coordination meetings. However, innovative methods to enhance coordination may include real-time communication among street outreach teams while in the field (e.g., phone applications).

Recommendation #2: Increase access and availability to medical respite beds.

Approximately 22% of sheltered individuals were identified as experiencing chronic homelessness (see [Key Terms](#) for a definition). Therefore, efforts should be made to increase the number of available medical respite beds to ensure that individuals with disabilities have access to safe and secure housing to meet their needs. Community-based shelter organizations, local government officials, and hospitals should collaborate to secure the necessary funding to increase respite bed availability and/or fund additional outreach workers to navigate health services. This is especially important given the high number of individuals experiencing homelessness over the age of 62.

Recommendation #3: Enhance family support services.

A significant number of sheltered and unsheltered individuals in Pinellas County are younger than 18. Therefore, it is necessary to increase family outreach services to address non-homeless related parenting issues (e.g., reading/writing skills, disciplinary practices, parenting skills, financial literacy, etc.). There is a well-documented connection between illiteracy and

criminal justice system involvement (Governors Early Literacy Foundation, 2023). For example, approximately 66% of children who are illiterate in 4th grade will be arrested or receive welfare (Governors Early Literacy Foundation, 2023). Therefore, shelters and resource centers should consider partnering with family service providers to provide in-reach family support services.

Recommendation #4: Increase employment and income opportunities.

The primary reason that housing was lost among unsheltered individuals experiencing homelessness was related to insufficient income and/or lack of employment. This trend has remained consistent over the years and represents a key area for improvement. It is important for community-based organizations to offer vocational support programs (e.g., job training, resume-building classes, etc.) to improve job readiness skills and integrating workforce development with homeless services and access points (e.g., co-locating workforce service system staff at access points). Furthermore, organizations and outreach teams should incorporate SSI/SSDI Outreach, Access, and Recovery (SOAR)-trained staff to effectively complete a thorough SSI/SSDI application packet.

Recommendation #5: Advocate for the enforcement of antidiscrimination housing policies.

There remains a disproportionate number of Black/African American families experiencing homelessness across Pinellas County. Efforts should be made to strengthen the enforcement of fair housing laws to combat discrimination in the housing market. This may include regular audits to identify incidents of discrimination, legal assistance to offer free or low-cost legal assistance to victims of housing discrimination, and public education campaigns to inform both renters and landlords about fair housing rights and responsibilities. Community-based organizations may also employ community liaisons who can bridge the gap between fair housing agencies and marginalized communities to build trust and encourage reporting of

discriminatory practices. Community liaisons may also engage with leaders within Black/African American communities to develop and implement solutions that are tailored to the specific needs and challenges faced by these communities.

It will also be necessary to take steps to ensure that anti-discrimination efforts address justice-involved populations experiencing homelessness. Specifically, local leaders must promote HUD's upcoming guidance to provide housing assistance to people with an arrest history. Specifically, this [guidance](#) should be used to ensure that HUD-subsidized housing providers do not unnecessarily deny housing assistance to people with criminal records. This will be essential, given the expected increase in criminal justice system involvement following the *Grants Pass v. Johnson* ruling, which will make it easier to criminalize homelessness.

Recommendation #6: Coordinate with law enforcement and public safety personnel.

Law enforcement agencies are an integral part of the Pinellas CoC. Therefore, community-based agencies should facilitate regular and sustained planning meetings with law enforcement agencies to review policies/procedures and strategies to address homelessness. Community-based agencies may offer training on best practices for interacting with individuals experiencing homelessness, emphasizing de-escalation techniques, trauma-informed care, and motivational interviewing to increase connections to care. Furthermore, planning meetings can be used to co-develop coordinated response plans that outline specific roles and responsibilities for law enforcement and community-based agencies when addressing homelessness-related incidents. As part of this process, law enforcement and community-based agencies will also need to establish data sharing agreements to facilitate the exchange of information related to homelessness. This will allow analyses on homelessness-related incidents and interactions with law enforcement to identify trends, challenges, and opportunities for improvement.

APPENDIX A. POINT IN TIME COUNT SURVEY

Pinellas County Homeless Survey

Unable to Complete Survey

Hello, my name is _____ and I am a volunteer for the Homeless Leadership Alliance of Pinellas. We are conducting a brief survey of where people slept last night to help us better provide programs and services for persons experiencing homelessness. Please understand that you can prefer not to answer any question and your participation is voluntary. Do you have a few minutes to complete this survey?

Volunteer Name: _____ Time of Day: _____ AM/ PM (nearest ¼ hour)

Location: Street Camp Public building Bus Stop Meal site Other: _____

City where completed: _____ Survey Zone: _____ Team Lead Name: _____

1. Where did you sleep last night? **(Do not read categories. Select the best response based on what you are told)**
- On the street, in a car, park, camp, etc. Couch surfing
- Staying in a shelter, name: _____ In jail/prison **(STOP Survey)**
- Transitional housing, name: _____ In a hospital/treatment facility **(STOP Survey)**
- Hotel/motel, paid for by: _____ In a house/apartment you rent/own **(STOP Survey)**
2. Have you completed this survey earlier today?
- No, I have not participated **(Read Consent - on back of clipboard - & Continue to Question 3)**
- Yes Where? _____ **(If Yes, thank respondent for their participation and conclude the survey.)**

NOTE: Every person who is 18 or older and present needs to complete their own survey.

3. First Name: _____ Last Name: _____ Doesn't Know Prefer not to Answer
4. Date of Birth: ____ / ____ / ____ **(birth month and year are required)** Doesn't Know Prefer not to Answer
5. SSN: _____ -- _____ -- _____ **(last 4 digits are required)** Doesn't Know Prefer not to Answer
6. How do you identify your gender? **(check all that apply)** Man (Boy, if child) Woman (Girl if child) Transgender Non-Binary
- Culturally Specific Identity (e.g., Two-Spirit) Questioning Different Identity Doesn't Know Prefer not to Answer
7. Are you currently pregnant? Yes No Doesn't Know Prefer not to Answer
8. With what race do you identify? **(check all that apply)** American Indian, Alaskan Native, or Indigenous Asian or Asian American
- Black, African American, or African Hispanic/Latina/e/o Native Hawaiian or Pacific Islander White Doesn't Know Prefer not to Answer
9. Are you currently, or have you ever served in the United States Military? Yes No Doesn't Know Prefer not to Answer
- If yes, please thank them for their service.**
10. What was the last grade you completed in school?
- Less than 5 5-6 7-8 9-11 High School GED Some College Associate Degree
- Bachelor's Degree Graduate Degree Vocational Certification Doesn't Know Prefer not to Answer
11. How long were you in Pinellas County before you became unhoused? I arrived unhoused Less than 1 month 1-3 months More than 3 months, less than 12 months 1 year or longer Lifetime Resident Doesn't Know Prefer not to Answer
12. What area do you mainly stay in? Clearwater Dunedin Gulfport Kenneth City Largo Lealman
- Tarpon Springs Safety Harbor Pinellas Park St. Pete Beach St. Pete Hillsborough County
- Pasco County Other Cities/Countries/States: _____ Doesn't Know Prefer not to Answer
13. Were you ever in Foster Care? Yes No Doesn't Know Prefer not to Answer
14. Do you identify yourself to be: Heterosexual Gay Lesbian Bisexual Questioning or Unsure
- Other/not listed, please specify: _____ Prefer not to Answer
15. If housing-related opportunities are available, would you like to provide contact information, so we can contact you?
- (if no contact info available, provide resource handout)**
- Phone Number: _____ Email Address: _____
- Frequent Location / Mailing Address: _____

Turn Over

16. What was the primary reason that caused you to lose your permanent housing this time? **(Check only one)**

- Lost job, financial problems, not enough income
- Lost Home through Foreclosure
- Eviction
- Medical Conditions
- Family Issues
- Natural/Other Disaster
- Left to Escape Abuse (Domestic Violence/other)
- Recent Immigration
- Mental Health Problems
- Alcohol or Drug Problems
- Disabling Condition
- Jail/prison
- Criminal History (Including DJJ)
- Doesn't Know
- Prefer not to Answer

17. How many times, if ever, have you been evicted? _____

18. **(If they have ever been evicted)** Have you been evicted in Pinellas County? Yes No Doesn't Know Prefer not to Answer

19. Have you been in jail or prison within the last 12 months? Yes No Doesn't Know Prefer not to Answer

20. In the past 3 years, how many months in total do you think you have been unhousted?

- One month (this is the first month)
- 2 months
- 3 months
- 4 months
- 5 months
- 6 months
- 7 months
- 8 months
- 9 months
- 10 months
- 11 months
- 12 months
- More than 12 months
- Doesn't Know
- Prefer not to Answer

21. Including this time, how many separate times have you stayed on the streets or in shelters in the last 3 years?

- 1 Time
- 2 Times
- 3 Times
- 4 or More Times
- Doesn't Know
- Prefer not to Answer

22. How long have you currently been unhousted?

Only include continuous time spent in shelters or on the streets since the individual's last housing (rental, owned, staying with family/friends) or time spent in a hospital or jail/prison.

_____ Years _____ Months _____ Days Doesn't Know Prefer not to Answer

23. Do you suffer from or have any of the following conditions or health issues: **(Read all categories and check all that apply)**

- Alcohol Use Disorder..... Yes No Doesn't Know Prefer not to Answer
- Drug Use Disorder..... Yes No Doesn't Know Prefer not to Answer
- Chronic Health Condition Yes No Doesn't Know Prefer not to Answer
- Developmental Disability..... Yes No Doesn't Know Prefer not to Answer
- HIV/AIDS..... Yes No Doesn't Know Prefer not to Answer
- Mental Health Disorder..... Yes No Doesn't Know Prefer not to Answer
- Physical Disability..... Yes No Doesn't Know Prefer not to Answer

24. Do you have access to health services or a medical clinic?

- Yes No Doesn't Know Prefer not to Answer

25. Are you a survivor of domestic violence, dating violence, sexual assault, or stalking?

- Yes No Doesn't Know Prefer not to Answer

26. **(If yes)** Is the current unhousted situation a result of fleeing from domestic violence, dating violence, sexual assault, or stalking?

- Yes No Doesn't Know Prefer not to Answer

27. Do you currently have any other adults or children under the age of 18 in your household, who are unhousted with you? Yes No

28. **(If yes)** How many adults (18 or older) _____ and children (under 18) _____?

Please complete the information below for household members so the survey can be matched with the supplemental form.

First Name: _____ Last Name: _____ Age: _____

First Name: _____ Last Name: _____ Age: _____

First Name: _____ Last Name: _____ Age: _____

First Name: _____ Last Name: _____ Age: _____

First Name: _____ Last Name: _____ Age: _____

Complete the supplemental survey for any household member under the age of 18 or any adults not currently present.

If no further members need to be added to the household, thank the respondent for their participation and conclude the survey.

Respondent who took the survey: _____ (Not the volunteer's name!)

DRAFT Supplemental Survey for Additional Household Members - Attach to Primary Household Member's

1. First Name: _____ Last Name: _____ Doesn't know Prefer not to Answer
2. Date of Birth: ____ / ____ / ____ (birth month and year are required) Doesn't know Prefer not to Answer
3. SSN: _____ -- _____ -- _____ (last 4 digits are required) Doesn't know Prefer not to Answer
4. How do you identify your gender (check all that apply)? Man (Boy, if child) Woman (Girl if child) Culturally Specific Identity (e.g., Two-Spirit) Transgender Non-Binary Questioning Different Identity Different Identity
 Doesn't Know Prefer not to Answer
5. With what race do you identify? (check all that apply): American Indian, Alaskan Native, or Indigenous Asian or Asian American Black, African American, or African Hispanic/Latina/e/o Native Hawaiian or Pacific Islander White
 Doesn't know Prefer not to Answer
6. Are they currently, or have they ever served in the United States Military? Yes No Doesn't Know Prefer not to Answer
7. What is the individual's relationship to you? Child Spouse/Partner Other Family Other non-family
 Prefer not to Answer

Chronic (persons)	0	0	0	0	2	0	0	2	100%	0%	0%	100%

Note. Green reflects a percent increase while red reflects a percent decrease. There was a significant increase in the percent of individuals between the ages of 18 to 24 in 2024. Emergency shelter (ES); transitional housing (TH); safe haven (SH). Domestic violence shelters do not provide raw data to protect confidentiality; therefore, age reclassifications could not be calculated. In instances with a percent change from a zero value, a 100% change is noted.

	Sheltered				Domestic Violence				Total			
	ES	TH	SH	Total	ES	TH	SH	Total	ES	TH	SH	Total
Adults with a serious mental illness	128	22	26	176	0	0	0	0	128	22	26	176
Adults with a substance use disorder	58	51	10	119	0	0	0	0	58	51	10	119
Adults with HIV/AIDS	13	3	0	16	0	0	0	0	13	3	0	16
Adult survivors of domestic violence	18	6	1	25	45	9	0	54	63	15	1	79

Note. All data are self-reported and do not represent official diagnoses. Subpopulation data is not mutually exclusive (e.g., a person may have a mental illness and a co-occurring substance use disorder).

<p><i>Note.</i> Parenting youth refer to persons younger than 25 who are the parent or legal guardian of one or more children (younger than 18) who are present with or sleeping in the same place as the youth parent. This category includes both minors (under 18) and young adults (18-24). Percentages reflect the proportion for each category [i.e., sheltered (<i>N</i>=19) and unsheltered (<i>N</i>=2)]. The percentages were calculated by dividing the number for each subcategory (e.g., White) by the total population of sheltered and unsheltered populations. This method was used to standardize the data to make meaningful between-group comparisons across sheltered and unsheltered populations.</p>

Other	82	68	59	79	52	75	74	.
Total	478	538	621	635	714	626	675	152

Note. Gender and race represent the categories used by the Pinellas County Sheriff's Office (PCSO). Municipality was not tracked during the 2024 count. Although zip codes are provided, it may be misleading to estimate the 2024 municipality count (e.g., zip codes may overlap with multiple municipalities). The 2024 count excluded individuals if they were custody longer than 90 days, disclosed a permanent address upon release (excluding shelters or treatment centers), transferred to state prison, or transferred to another county or jurisdiction. Prior years did not utilize this methodology, which likely explains the sharp decrease of incarcerated individuals.

<p><i>Note.</i> PCSB data is a cumulative count from 8/12/23 to 1/31/24; this does not include students who were identified as experiencing homelessness after 1/31/24. Data provided by the PCSB suppresses categories with counts less than 10 to ensure privacy [i.e., categories with fewer than 10 students are denoted with an asterisk (**)]. Therefore, the total counts do not always match the specific count of subcategorized age groupings. Gender and race categories were provided by the PCSB and do not align with HUD reporting standards. Female (F), male (M).</p>
